Thread: [Starting a cryptocurrency game/gambling site \(hiring\)](#)

Mr.Woke - November 9, 2017, 7:20 am

Hello,

I know its a bit late in the game, but I'm interested to invest and to develop a gambling platform for cryptos.

I'd like to support the top 25 or 50 coins.

I'm looking for some developers who are knowledgeable in the field.

I'd like to build something like csgofast.com

I've also been glancing at the idea of a browser based MMO with crypto as currency.

I work in IT and I'll be happy to discuss my background with anyone potentially interested.

If anyone would be interested in a partnership, that could also be possible.

Either way, PM me!

Rude Boy - November 10, 2017, 4:23 am

UI Developer here with html5, css3, sass, js, jquery, angularjs, angular 2/4 knowledge. How may i help you?

~Rude Boy?

You are not too late, it all depends on how much money & time you have to invest to make sure you succeed. There is a lot of competition out there that is true, but you can still climb and be successful. Anyway, I wish you luck ?

I just stumbled across this post and I thought I'd let you know if you need any help graphics wise feel free to hit me up. (Does this make sense grammar wise O.o??)

Contrarietas - November 10, 2017, 6:37 am

Hey. I'm a member of a developer team. We are working on a Bitcoin Dice Script, which will be available for everyone (of course not for free). Some of the functions: Admin Panel, Referral Program, Customizable house edge etc. It will be completed soon.
