Considering all of the scraping options as well as the minimal amount of time it takes to scrape a hefty list of proxies, I couldn't be more satisfied. I've yet to get a list of proxies that I was disappointed with. Good job with this [System\[X\]](#)! Huge vouch.

I have bought the tool some time ago now and I have been frequently using these proxies to crack accounts. Although the design of the program is not that best and not that uptodate, the proxies are fast and won't get banned that fast at certain services like Netflix. I can fully recommend this tool to everyone and everybody, because this one is definitely worth your money!

Hi everyone, I bought this tool today. SystemX was quick in response and handling my doubts, he is a very good guy.

Coming over to the tool, I can grab many private types of proxies, which are updated after few hours. Easily grabs 20-60k depending on how much is required.

Most of them are live.

Two type of checkers are there, Fast and normal one.

I had good results with both, I prefer using Fast checker. I have attached a screenshot of checking status too.

Most of the proxies are live, and working.

UI is simple, clean and easy to use.

10\$ is def. worth the money, since we are promised for lifetime updates on it.

Screenshots:

Sorry, we do not do trials.

Proxys are either SOCKS5 or HTTP. Most are high elite and also are SSL supported. There is also a geo location filter to get just the country's you need.

Also just updated the other day and all checking is done on our own server for lightning speeds.

I'll vouch for this. The program runs really fast. When I run proxies through the checker it does seem like a high percentage are dead. I'm not experienced with proxy scrapers so idk what a good ratio of alive to dead proxies is, but this one finds enough proxies and runs quickly enough that the high percentage of dead proxies does not actually cause any issues.

Yes the speeds are fast and the lists are refreshed every 2 hours so if you get many dead, wait till they refresh and try again. But like you said, you get enough alive to compensate for that and most are high quality elite proxys.

Last night there was an average of 4k alive. Lists refresh every 2 hours with fresh proxys added every 2 hours.

Never used titanproxy.

Anon proxy Tool is protected by 961API.

If your hwid changes then that's fine, you can change it yourself any time for free from your webpanel that you also get.

Hope this answers your questions.

More private proxys will be added soon, just purchased another private proxy server, so add an extra 7k alive proxys to it :)

for life? lol?

I can not guarantee the life of the program, no one can.

Lifetime means the lifetime of the tool, not you.

So far i have been dealing with proxys and creating proxy tools for around 6 Years. First 1 was the famous ProxyX (you may have heard of it) that lasted for around 4 years. This one will double that easy.

This tool also has thousands of private paid proxys that i pay subscriptions for, you pay a small 1 off fee and you get all them private paid proxys when ever you want them free within the tool, they refresh daily.

If you need fresh proxys lists, You don't need to look any further. 100% customer satisfaction.

Still selling.

REVIEW:

Overall Speed 10/10

Features: 7/10

Price: 10/10

Bought it and I'm happy, I do miss some filter features & I also receive the above error message, if those can be created/fixed then I'll give a 10/10.

Features Like:

1) Filter on Proxy Speed/Anonymity/Country (it would be great if the top bar works so you can filter on all the available headers)

2) Export on multiple selection within the drop-down menu, I can for instance export all High Elite proxies, but proxies from China don't work with porn websites. If I want to change this I need to export country for country, instead of just selecting multiple countries.

I get asked all the time, what is the difference with Anon Proxy Tool to others ?
Well lets just list a few of many

VPS for checking

Our own checking scripts, no API's for checking.

Thousands of Real Private proxys(we pay subscriptions for you to have private proxys)

Real time stats

Checker shows country/city

shows anonymity levels

does SSL checks

Checks SOCKS(Yes, also checks SOCKS proxys)

This is just a small list of many features.

Premium Tools and Programs-The Best Proxy Tool On HF. Fresh Lists every 2 hours. Proxy Checker. Private Proxys is the best one that i have ever had omg wow good job and thankyou for the help you gave me bro

G?df?t?? - September 25, 2018, 1:13 pm

Anon is easily the biggest bang for your buck on the market. I've been steadily using this tool and I have had nothing but a smooth experience. Considering all of the scraping options as well as the minimal amount of time it takes to scrape a hefty list of proxies, I couldn't be more satisfied. I've yet to get a list of proxies that I was disappointed with. Good job with this [System\[X\]](#)! Huge vouch.

Checked with the owner prior to buying if this would work well with a twitch bot was informed the public proxys would not but the private ones should and just wanted to inform future buyers in my experience neither worked for twitch but you can only expect so much from a hf scrapper with so many hf twitch bots

I said they should not that they will, try again after the private proxys are refreshed. Remember tho that other customers maybe using it for twitch too. The public proxys will probs not work, after all they are public but the private proxys are 100% private that i pay for, for you guys to use.

Nothing to do with it being a tool sold on HF (HF scraper ?)

You simply retyped what i said? No need to take offense. You have a HF scrapper next to all the HF twitch bots you can only expect all the private proxys you said should work wouldnt because they are abused the moment they hit the "tool".

I said they should work, because they should. If they have been abused or used by another user does not meen the proxys dont work, they just used. best to try as soon as the list refreshes with fresh proxys.

I know user that use twitch bots and use my proxys too and sometime works like a charm and sometimes not because there used. Its common sense really that once used too many times you can keep using them.

You literally keep making long replicas of what I've already said. There's no need to continue on and getting upset, a customer should be able to leave their input and experience without going through all this with you.

Yes, but depends on the accounts, the tool used to crack them and if the proxy has been used on that site. Overall the answer is yes.

GKL.HF - November 18, 2018, 7:48 am

I purchased this recently and it has been one of the best purchases I've made in a while. The proxies are super great Anon offer different proxy types too. The proxy checker is great too, I also really like the fact you can export it, saving time and keep consistency through out your lists. Staff are really great and friendly. Thank's a lot Anon Proxy team! HUGE vouch!

Brady1225 - November 18, 2018, 12:12 pm

Purchased a lifetime membership a while back and here's my review:

Proxies grabbed: 9/10

This tool is no short of almost flawless regarding the sheer numbers of proxies grabbed, usually, within seconds it can pull 20k proxies, which after checking & nitpicking to the ones that I want, I end up with 400ish perfectly usable elite/anonymous proxies.

Proxy checker: 5/10

Not going to lie the checker isn't great by any means, while it does work, even by increasing the thread count, it's very slow. However, this should not be a key factor when considering purchasing this product. There are numerous FREE proxy checkers available online which can do the job just as well, so for that; I will not take off any points for the proxy checker.

Support: 10/10

Speaking from personal experience, I had an issue of which I had no clue how to solve, however after navigating to their discord; I discovered that they had a server that has multiple mods, who respond within a very timely manner. Not only was this support friendly, but the mod went in detail to exactly what I needed to do in order to fix my issue. This single experience with the support team earned a perfect score in my book.

Conclusion:

In conclusion, for \$10 this product is worth every penny. Overall I'd give it a 9.5/10, as I mentioned that I would not be taking off any points for the proxy checker, as it is just a bonus feature. I want to give a massive vouch to SystemX; I'd highly recommend purchasing this product.

They are good for anything, last i checked there were over 16k alive fresh proxys.

Private proxys that we have would be the best and to even further that using socks would improve it greatly(if your tool support socks).

Also the proxys lists are refreshed every 2 hours.

Private proxys lists are already pre checked saving you time.

Vouch!

I have bought the tool some time ago now and I have been frequently using these proxies to crack accounts. Although the design of the program is not that best and not that uptodate, the proxies are fast and won't get banned that fast at certain services like Netflix. I can fully recommend this tool to everyone and everybody, because this one is definitely worth your money!

Given there is an `export to txt` feature I thought you were open to this kind of possibility. I should have perhaps specified my need, because I would indeed like to "try" to use it as a little part of a sideproject's backend which need to query via proxies to dodge api's rate limit, basic ? .

If I'm not mistaken there is no "terms of service" for your product so I don't really see the clear limit of the usage here... are you against to this usage ?

I will add a force stop to the threads for the stop button, it seems that in your case a few proxys are hung somewhere and not getting the timeout.

So, if I run it subsequently twice or even more than that (back-to-back within seconds or within minutes, say, 1-5 minutes), would it give me back a very-similar (if not exact) proxy list?. If it is going to, what is the suggested time before expecting new proxies. If t is not going to, what prevents that?.

The checker itself is 99% accurate with alive proxys from the point of checking. Does your tool support socks, have you tryed them ?

The country section is down till Monday. Also a traffic bot is not the best to test these proxys with and depends on the sites used for it.

This tool has been going and updated since 2017 and 4 years befor that with its previous name of ProxyX.

To make a long story short, the program works, but could also be better. If you have proxies, it does a good job sorting out the good from the bad, as well as differentiating the type. As far as getting the proxies, it can be hit or miss. I had one day where it was able to pull a lot of proxies but other than that, it kept pulling the same proxies or simply not pulling them at all. Along with that, the program crashed every so often. For the price though, it gets the job done. Would recommend. ?

If you have proxies, it does a good job sorting out the good from the bad, as well as differentiating the type. As far as getting the proxies, it can be hit or miss. Thanks for the feedback, as for the proxies it does refresh the lists every 2 hours and are you refering to the public lists or the private lists ? For crashes this is 95% due to using too many threads for your PC to handle.

Thanks

Public list, sorry. As far as private, I'm aware it refreshes every 2 hours, but only so many are

actually alive and work. No complaints about that tho. I've also been having issues when trying to pull proxies from a list of sites. It worked once for me where I was able to pull 300K proxies, but it hasn't worked since.

I keep getting, The Request was aborted: Could not create SSL/TLS secure channel.

It used to work fine before I don't know what changed.

Posting here to get your attention.

I want to buy this tool, but I have some questions for you.

Please send me a PM, once you read this post. I will ask you a few questions and purchase it with Bytes if still possible.

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley

Looks interesting! Is it possible to do a combination deal of bytes and dollars or does it have to be one or the other?

xReckless - August 21, 2020, 8:04 pm

Can I use this on regular windows 10 ?

fxllzy - August 22, 2020, 2:12 am

Just replying as this might be useful for me in the future. glws!

I am getting an error opening your program, "The Request was aborted: Could not create SSL/TLS secure channel. Anyone else getting this? please help

John Doe - October 30, 2020, 10:41 pm

Did you remove the private proxies tab, as when i press it, it cant load any of the private ones anymore.

I do have a license yes. I just re-downloaded it off the net auth / upload / anon proxy tool
url idk if i might have an old url

piet - *October 31, 2020, 7:58 am*

Hello, sometime ago i bought your proxy tool but i lost my key and the download link can you resend it to me
