Thread: [Keep the pink ub3r stars, yellow l33t stars](#)

Imkasumidloke - November 12, 2017, 9:00 am

also keep the current ub3r blue. and the current yellow l33t exact colors
keep the ub3r userbar oldschool, and l33t, ect.

Is this the original ub3r color? I feel like it was a little lighter!

But yes keep retro HF! (Or make a plugin to allow theme specific username styles, to have modern and retro themes)

Off topic: do you realize the character in your profile picture is not Peppa pig but George the pig?

IDK but I found it kinda funny lol.

I'm pretty sure it's gonna stay this way. I liked the old username color though, the one with the shadow.

Imkasumidloke - November 12, 2017, 9:18 am

I want it to stay the current way too.

I just DO NOT want it to change to this...

I like that one more :/

EDIT: Also sorta off topic, but what do the stars even mean?

There won't ever be complete agreement whichever way Omni decides to go, just let the man do his thing.

Cammy - November 12, 2017, 9:51 am

I really don't care what happens to the theme, i'll just tweak it to my own preferences with userscripts
Maybe instead of complaining like a bunch of cunts people should just accept the way it is now or try to learn something for once and make their own themes instead
