Thread: [\[WiP\] DotSigner alpha | Create certificates & Sign assemblies!](#)

gigajew - November 12, 2017, 3:35 pm

This is an early release, which features a basic operational build. DotSigner will allow you to generate pfx certificates and sign assemblies. Currently it's using signtool.exe in order to sign the assembly, but hopefully in the future it can sign on it's own. It does not currently allow specifying certificate contact information, or any publisher details. I haven't yet seen many crypters that are able to sign their stubs. Maybe that will change with tools like these readily available. Please do report any possible bugs here in this thread.

Usage:

Code using com.gigajew.DotSigner.Core;

```
public static class Crypter {  
    public static void Main(string[] argv) {  
        Signer.Sign("stub.exe", "password", DateTime.Now.AddYears(3));  
    }  
}
```

I don't know if it's good or not for FUD but thanks for this release

gigajew - November 13, 2017, 2:31 pm

It could be. It should certainly be better than stealing certificates at least

0xDEAD10CC - November 14, 2017, 2:09 pm

Even if you looked at the IAT for the tool you should be able to discover some of the functions that it calls and easily do it all manually rather than relying on a tool which already has command line options.

gigajew - November 14, 2017, 3:25 pm

I didn't think about that, thanks. Anyway I was primarily focusing on generating a PFX

Ninja - November 14, 2017, 6:08 pm

No Github. Makes me sad. :^(

gigajew - November 14, 2017, 6:14 pm

The code is kinda messy atm, I was mainly focusing on getting it to work

Autist - November 16, 2017, 6:17 pm

Why do you have anti-sandboxie? this is very sketchy

gigajew - November 16, 2017, 7:16 pm

I don't. What makes you think that?

Why release it before cleaning it up tho?

gigajew - November 18, 2017, 10:00 am

Early release for crypter developers to test results

You never should write bad code though. Strive to write good code from the start.

Autist - November 18, 2017, 10:17 am

When i open it it just closes? why is that

gigajew - November 18, 2017, 3:28 pm

What does? The library file?

kevy42 - November 19, 2017, 8:41 am

Srry if im being a noob but whats the point of this?, it wont bypass anything

gigajew - November 19, 2017, 11:11 am

Some anti viruses in the past have skipped scanning the file if they had a valid signature, but yeah idk

kevy42 - November 19, 2017, 7:47 pm

But it isnt "valid", u need to buy a 300\$ cert from bill the money hungry bastard gates

Pim Fortuyn - November 25, 2017, 4:57 pm

cant we spoof certs somehow maybe.

probably not though...

Neit, sadly. But if u wana bypass smartscreen alone u can simply remove the file ZoneID and rar it up to prevent it from being re-added

Leo Mikaelson - November 26, 2017, 3:37 am

Either way good effort, nice to see people making an effort. Criticism isn't hard to find but productivity is.

If I could rep you would have received. Keep it up.

Yeah its alot but depends a lot on your scale i guess.
