Thread: [\[Business Management & Accounting/Finance\] Assignment Service](#)

Faceless Man - November 14, 2017, 11:51 am

About me

Hi, my name is Omega, I'm a dual degree graduate with a BA in Business Management and a Masters in Accounting and Finance.

As a long term student, I have faced many challenges throughout my academic career, these include: deadlines, long winded assignments etc.

Why me?

As a graduate I know I can perform at a high academic standard when it comes to writing assignments/reports etc. I can deliver your workload on time with a guarantee.

On the other hand, I also have experience working in an accounting firm and freelance accounting for commercial businesses.

Payment

Prices will be negotiated depending on workload and timeframe etc.

To avoid chargebacks from Paypal transactions, I will mainly accept Bitcoin. However, if you are deemed trusted (by me) I may accept Paypal.

Other payment methods like Ethereum (ETH) or Amazon Gift Cards may also be accepted. The buyer pays any fees.

ToS

3. You cannot and will not chargeback after receiving your work, or a dispute, report and community scam alert will be made against you with comprehensive proof.

4. After the uncensored work is received by the consumer (after your payment is confirmed), the consumer must look through the completed work and (if any) bring up any problems to Omega. Amendments needed to your work will be completed for free. If amendments are needed because you did not provide sufficient important information which was needed initially, it is your fault, and it may not be free depending on the amount of extra work is needed.

5. For Proof of Service, you may be contacted for permission to use your completed work (with any sensitive or revealing information censored) on this thread to allow other potential customers to see the legitimacy and quality of this service.

6. Any fees will be paid for by the buyer of the service when sending over payment for the completed service.
