Taking a keyboard with you is even more autistic than a fidget toy tho.

yea but u pull out fidget spinner or fidget toy in public ur automatically classified autism

Niklas Kronwall - November 15, 2017, 7:14 am

that fad died out real fast people who have fidget spinners have mechanical keyboards

aawon - November 15, 2017, 7:16 am

but when someone finds out how much i spent on my keyboard they're gonna think im autistic :(

solid build quality, mechanical switches make it easy to clean, obvious rgb's make it look sexy, hot

keys and the scroll wheel is metal and feels nice to the touch. I am never disappointed with their products lol
