Before you look at my thread. Please note that i'm only posting this thread to give people faith in making money. And you should never give up! I started from small and used my head to make money online.

I took more then 15 hours in a week to manage my channel + paid VIP group. So far i got over the 460+ members in paid channel. 90% of the users who paid me sent me 0.15BTC to join the paid channel.

Here a screenshot of people in my VIP paid group:

My group link: <https://t.me/CryptocurrencyTrends>

Currently also building a another group. So far at 4.2K members right now.

Earnings i'm recieving:

I also made a thread to make money online. Had 20+ members in the group who are probably making money right now. So what are you waiting on?

Feel free to PM me if you have any questions.
