Thread: [What cool things do you have on your desk?](#)

test - November 16, 2017, 4:01 am

Got bored and decided I want some cool, interesting or neat things for my desk. Price isn't really a limit.

Currently I only have my speakers, monitors and keyboard etc.

I don't have a huge amount of room but what do you suggest? Anything from sites like Aliexpress or ThinkGeek? Feel free to post pictures of your desk setup if you want.

REDVOID™ - November 16, 2017, 4:15 am

I wish i had an kawaii chick on my desk, but the coolest thing i have is magnetic sticky notes that sticks just anywhere!

I am gagging for a good wall mount at the moment.

My current setup is pretty fucked right now, the monitor at the top is standing on a printer plus a bass to get it up there.

Going to be pretty once I get everything wall mounted and aligned, plus get my 4k TV up there as well. Doggo will be used to hold my future VR headset plus my headphones.

Post yo shit op, easier to give suggestions.
