Thread: [Wordfence Security \(wordpress\) - PREMIUM - \\$49 LIMITED TIME OFFER](#)

Wordfence is a free plugin you can use on your WordPress site to scan for hacked files and to monitor the access of visitors to your site. You do not need to enter an API key in the "API Key" field for the free version; however, not all the functions are available for free. This license is the paid license for the best protection.

I currently have WordFence licenses.

These are legit keys/licenses. They are not CCed or hacked.

Wordfence is a fantastic plugin for WP based sites I install the free one by default as part of my site hardening process whenever I put a WP install in.

To get this @ 1/2 price is a real bargain for sites who have the serious need to security, and realistically ANY WP site needs security.

Next site I gotta build you can likely expect a PM from me.

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley
