Thread: [Having trouble ranking videos on youtube](#)

Sid™ - November 16, 2017, 11:30 pm

Hey guys

So recently I put up a few niches and made original youtube videos for all of them. They're all commented and I boosted them with 15k-20k views per video and around 90%/10% like dislike ratio. I didn't add any comments yet. The videos were unlisted while the views were being added and then I made them public. I haven't really been able to rank any of them successfully so far though and am struggling quite a bit. Does anyone have any tips? How important are comments for ranking? Should I have consistent views coming for a week or two in order to rank? What are some websites or places where I could go to buy comments or you guys would suggest for views/likes etc. Honestly any tips are appreciated. I used to do this a few years back and I was quite successful with it and was able to rank my videos easily but I am finding 0 results with old methods now.

Thanks guys

I can help you out, PM me on of those videos url to take a closer look. Youtube algorithm is changing almost every month.

I would rather not reveal my niche. They aren't anything new but still. Any tips you can provide otherwise would be greatly appreciated!
