whokid2017 - November 19, 2017, 2:58 am

Just bought leads form him

paid 30usd

he sent me the list of 1m no problem at all

but

1. i wanted uk leads so he added .uk at the end of most of the uk leads

cynth_black@yahoo.com.uk

cynth_brns@yahoo.com.uk

cynth_hntr@yahoo.com.uk

after i told him he refunded me back so thats was not a problem

Quetzalcoatll - November 19, 2017, 3:14 am

I sent to you file that i have on my PC i didnt check all leads one by one, you told me problem and i refund money to you.

Dont know why are you complain. Removing those yahoo.com.uk you can use more than 300k mails for free.

Sorry about that. cheers

mackmall - November 21, 2017, 10:20 am

A few questions:

1.What's the difference between IP and Domain smtp's?

2. What exactly are mailers and how do you use them?

3. How old are the USA Leads and how were they acquired? Do they come with names and opt in info or just emails?

Thanks

Quetzalcoatll - November 22, 2017, 2:00 am

Format of ip smtps is : ip:user:password and of domain smtp :

domain.com:user@domain.com:password

Domain smtps is better to hit inbox and ip smtps can send more mails.

USA Leads are really fresh extracted from cps and shells and they are only mails.

@blackdark22 you are really a funny guy.

i gaved you alot of smtps , and you are complaining about every one.

You spam with your own ip, and when i told you its blacklisted you start talking shit.
How smart you have to be to spam from your own PC ?

Please google "How to spam" and after that say shit about my thread.
IF you think you are scammed you have Deal Dispute, i will be more than happy to show proofs there.

Bought 20 shells for php mail() 3 days ago. More than half didnt send, he fixed a few.

Im still waiting for 7 more working shells.

I dont advice anyone dealing with this user.

I will update this post if problems are resolved.
