RedRose12041999 - November 19, 2017, 6:02 am

Yeap,Mirai Nikki Redial.Even thought it was one episode it was nice.

Chad ThunderCock - November 19, 2017, 6:11 am

Its the second time I hear people mention this today, is a new OVA coming out or what? Isn't redial like 5 or 6 years old already?

Omtism - November 19, 2017, 11:09 am

It's not the redial, it's a whole new episode.

Do you have any links or sources?

Energy Wizard - November 19, 2017, 11:21 am

I'm confused of this as well. It seems like they just bundled the OVA with the DVD release? Not quite sure.

It was good / okay for 1 episode thing. Filled some caps I had in my head.

Tyranny - November 20, 2017, 7:33 am

There is no new episode, it is the Redial OVA episode that is being referenced here, it is just being bundled with the series for physical release.

Esdese - November 20, 2017, 8:16 am

Redial is great, glad it's a thing or else I would not have enjoyed the series ending.

I mean... unless he was part of the making or has some type of verifiable source, I don't see how he could be 100% positive. Idk tho...

Energy Wizard - November 20, 2017, 10:12 am

You guys are disappointing me. Read the article on Crunchyroll that I provided, explains it there. The OVA has been released for a while, it's just that they are including it in the physical release now. Nothing special.

Tbh the ending was a masterpiece (non redial) IMO. Even though it wasn't a happy ending it felt right and we knew it would have to happen regardless, the way they made the ending with all those emotions mixed in it made it one of the most memorable endings I've ever seen, watched the anime well over 5 years ago and still remember it crystal clear.

Redial just helped ease the pain in our heart :)

My Yuno girlfriend still hasn't replied, I don't think she's my girlfriend anymore :(

How do you feel watching an Anime named after a famous IOT botnet?
