Thread: [How much money do you spend every week?](#)

Hackforums97 - November 21, 2017, 6:41 am

I've found myself over the past 6 months spending 1k\$-3k\$ a week on avg, It's really killing me. What about you guys?

I can't stay happy unless I legit spend all my money as I get it, it fucking sucks, I work 2-3 days out of the week on average and I spend it all thinking its going to make me happy, right now Im actually thinking of things that might make me happy around the 40k\$-60k\$ range smh

Money4life - November 21, 2017, 6:45 am

1-2k a week? Holy shit. Does that include rent n stuff or only stuff for yourself?

Armada - November 21, 2017, 6:47 am

Hmmm..
Lets see..

Break down would be something around this:

- \$300 week rent/utilities
- \$200 week food/groceries
- \$70 week transportation
- \$150 week ciggarettes
- \$160 week greens
- \$120 week drinks
- \$150 Misc expenses (random purchases)

So, yea about \$1150 roughly weekly.

Those are base expenses, not including if I go out and actually do stuff also.

And you make that by only selling licenses?

Although money used to be produced by trees, it certainly dont grow on them.

I feel this on a spiritual level. I've been married for a few years now, but when I was single I got myself used to a certain way to live and spend money, so \$600/mo on car payments was nothing. We just had a kid and I can't shake the need to literally just go out and buy something for our house for no other reason than I feel like spending money.

NOTHING MATTERS - November 21, 2017, 7:04 am

Lol, why not try living below your means and saving up the stacks for some true baller plays in the future?

I spend like 1-200/week (no rent) total not including buying shit to flip. Would be even less if I didn't eat out constantly.

Vitani's Mate - November 21, 2017, 7:11 am

Not really that much, probably only like \$200 max a week.

Sometimes more if I am buying games on a spending spree. I don't buy 1 or 2 games, I buy around 10 to 12 games. Sometimes I spend around \$400 to \$800 on games in one spend spree. ^^

Space• - November 21, 2017, 7:23 am

Nothing more than \$100 probably. I save my money most of the times to ball out when I'm a bit older.

spradebassen - November 21, 2017, 7:23 am

i usually make a big loan and spend it all immediately

this way i keep living on the edge

Cr1p - November 22, 2017, 9:28 am

I save over %50 of my income immediately because of taxes and good practice.

I spend probably <\$100/week.
