Gamekit is a site where you can earn Points and exchange these for games, steam wallet codes, lol skins or take part at giveaways (and more).

Sometimes it can take a while but if you do more quests at the same time then it is very profitable. I've tested it myself and can say its safe and legit.

About the points

You can't trade them for real money.

2899 Points are about 5,00€!

Ways to earn points

- Doing Quest(s) (mostly you need to play games) (highly recommended)
- Buy Points (not recommended)
- Do quizzes
- Rate Photos/Screenshots
- Play CS:GO (5pts/hr, max 40pts/day)
- Do typical tasks (offerwall, not recommended)
- Earn through refferals (highly recommended)
- Watch trailers
- Do Surveys

The most points you can get is from doing quests and refferals.

Just try it out yourself. More detailed Information you will find on their site:

I've looked but didn't found anything. Just try to go to their site and register. I think you can choose your region/country and if it isnt avabile then it will surely shown up.
