Thread: [\[Lifetime\] Schedule all your Instagram posts from the comfort of your tighty-whities](#)

kamikazeturtles - November 21, 2017, 12:06 pm

Lifetime Grum.co subscription -- Schedule posts on Instagram in bulk with a lifetime account.

All you have to do is upload photos or videos from your computer, tell Grum when you want to post them, and voila! You're done!

I got these Grum lifetime accounts during the Appsumo deal a year ago. Since then I've used them to manage my client's Instagram accounts.

I'm selling them for \$30.

Main features of these Grum lifetime accounts
Schedule Posts directly from your computer for any time in the future.

Control multiple Instagram accounts with one sign-in!

Give access to VAs without giving access to your Instagram account. (No more worrying about a disgruntled employee sabotaging your brand.)

The first comment feature. (This allows you to hide hashtags in your first comment so you don't look like a teenager with hashtag filled captions.)

Unlimited photo & video scheduling

Unlimited amount of editors who can manage an IG account together

And many more...

Grum usually charges \$9.95/month to schedule the posts of just two IG accounts. I am selling a Grum lifetime package that allows you to schedule posts using Grum for up to 6 Instagram accounts

Grum is a really cool tool. If you're interested in checking them out, their website is [Grum.co](#)

Price: \$30 for the lifetime account. I can only accept bitcoin.

Pm me if you're interested in an account

Sorry, but I can't give any vouch copies because I only own a few of these and once I run out, I run out.
