been using WLI for months awesome service

M?xim - November 22, 2017, 2:20 pm

Nice to see that WLI are now here. Can definitely vouch for their quality.

degado - November 22, 2017, 4:24 pm

for this service i would like to get a demo. not on tv or anything just access for the few days to see if it is worth it. i mean if it is good and results are satisfactory there is a better chance that people would by rother then buying first and then finding out that it is not what you expected.

dkaeq0 - November 22, 2017, 8:26 pm

I have been using WLI for a very long time, im pretty sure they have the most Databases than any other database search engine. i can definitely vouch for WLI :)

Well, well guess someone doesn't know much about Leakbase.

OP: Do you have the real Warframe/CDProjektRed/TWCenter, or are they the fake ones?
(passwords excluded or faked)

(Nov 26, 2017 04:17 PM)aviatsvi Wrote: [\[CITE\]](#) how to do advanced search and how to get more the 10k results?

The advanced search is from the old layout and is considered the Wildcard and Case Sensitive

search. As for the 10k results, we did not implement pagination at first because no reasonable search would yield more than 10k results. We have pagination planned on the next update, in the meantime you can view more than 10k results on the API.

We do have all those databases expect the TWCenter. We believe that the versions we have are real, however like in our Terms of Service we do not validate that data we receive. We receive all data from third party sources and we do not try to "test" the logins to make sure the data is real.

Warframe table has mostly randomly generated passwords, neither version would work

Not the same for TWCenter though

Not going to mention but 2 competitors have the real one and 1 has the fake (along with a fuck ton of fake ones), you know who they are. :)

We try our best to find updated databases. However, we do not control which websites gets hacked since we do not partake in any hacking ourselves. All our data comes from a third party source, so in the end it really depends on others.

We have an api documentation at <https://weleakinfo.com/api/documentation>

If you have further questions you can contact us on Twitter, Discord, or through our support system.

(Dec 4, 2017 09:17 AM)Abou Wadi3 Wrote: [\[CITE\]](#) This sounds interesting ! how long you update the listings ?

We import new databases every 2-3 days.

Vouch System Added!

Due to many requests for a vouch copy system, we have developed a custom vouch copy system on the site.

You will have to meet the requirements listed in the initial post to request one.

If your request is accepted, a URL will be sent as a reply.

After clicking on that URL and accepting the terms, 1 day will be added to your account.

We only allow 1 vouch copy per user!

We don't have IP range search yet, which is a good idea. We never had address search before, you're mistaking us for Leakedsource which shut down.

It usually means that the username or email is taken. We don't show that information due to security reasons.

Yes. LeakedSource got shut down & this is the best we can get, they're about the same thing actually.

I highly recommend it, I've seen others complain about it being down, but I have NEVER got any sort of downtime and I use it quite often if I am to be honest.

I'm not affiliated with the website so I wouldn't recommend it unless I truly meant it. ?

1. We are working to identify and solve the stability issue. The issue should not affect the API in anyway. But if it does, the website automatically recovers within 10 seconds.

2. We do not send emails from the website because a majority of our users use bogus emails to protect their identity and we encourage this. We will look into putting an email validator in the future for ticket notification.

Our site is fully functional. We have a slight stability issue but the web server is programmed to automatically recover within 10 seconds.

After receiving a Vouch Copy I must say that I am extremely impressed with this service. It is very easy to use and has a pretty good amount of information. I would not say this is near the end all be all nor does it have a lot of past leaks, BUT it does have a lot of specialty leaks, meaning very likely unsaturated. I likely won't use this in my line of work due to the pricing and benefit for me, but for MANY people this could be an amazing tool to add to the toolkit. I would recommend this service to people looking to purchase! The OP has also seem fairly laid back and easy to deal with personally.

This product earns the Roman Services Seal of Approval!

DoctorSheep Service Review for "WeLeakInfo.com" by "WeLeakInfo".

Before I begin my review, I would like to thank you for giving us ("Appraisers"), the opportunity to review your service.

First of all, I want to talk about the reputation of the service. "Weleakinfo.com" has become a considerable resource around multiple forums. They're the only database search engine that was able to get a lot of reputation in a short amount of time-based on the amount of growth it has gone through this past couple of months. If we look up the history of "Weleakinfo.com," you noticed that their foundation sold on several different forums. They are not only spanned on Hackforums.net

Now if we were to talk about the sales thread, the information is there. It's stated to be "The world's fastest & Largest Data Breach Search Engine." based on that statement, you have to be bold and have proof that has that stated on the forum. The thread design is very informational and straight to the point. Between the plans, API Pricing, and Payment Methods. If you compare pricing to other

sold databases, this is a great deal.

Packages Includes Simple - \$7 - 1 Week Access.

Pro - \$25 - 1 Month Access - 10 API Searches.

Elite - \$70 - 3 Month Access - 50 API Searches.

You also have the option to purchase a Lifetime Access, only if you're interested.

Payment Methods accepted are Paypal

The Website

Everything suitable for all customers interested in purchasing the membership for this Database.

Second of all, I want to talk about the website. If you click the website, It will take you to the official site: weleakinfo.com.

The site is very straightforward and not hard to understand. Everything is label correctly, and that's the expectation I have when it comes to online databases.

WeLeakinfo.com was kind enough to provide a trial version to test out, and I am highly impressed. The database tabs show a list of all the databases they have inserted into the search engine and continuously growing. Right now as I am posting this review, they have a Total Database of 2,474 all from different sites and time frames. Usually, several online databases don't provide that much information on the type of databases they have which can cause a lot of confusion, but WeLeakInfo was able to give the list, which shows how much confidence they have in their product.

Now, everything arranged between Support, API, Purchases, Lifetime Purchases, and Miscellaneous tab, which holds information including site privacy policies and terms of service. When we want to begin using the service, the search engine divides the type of information by a set category. Username

Email

Password

Hash

Name

IP Address

Phone Number

I type in several names and the results it provided.

The search engine has a time interval set to show how fast it was able to look through the database to find information on information I provided and which database it was located out it. Information was accurate and very informative. Although I was not able to look through everything since I was on a trial account, it was enough to write this review.

Final Thoughts

Finally, I will say that this service I can see it going a long way and getting several customers in the future. I can't wait to see where this goes and glad to be able to review this product. I can even see myself as a customer in the future.

I can approve this product. Good luck with sales mate.

Thank you for the review.

If anyone is interested we did do a search engine comparison a few months back when other competitive sites were online.

We tested for amount of results, amount of databases, features, and claims that services made.

All of the sites on the list is currently down at the time of writing this post except We Leak Info.

A lot of the cons on the list has now been resolved as well.

We were critical on ourselves as well as others.

Comparison: <https://ghostbin.com/paste/hp5d9>

Since the writing of that comparison on Ghostbin we have added the following: Wildcard & Regex Feature Added

- Increased supported Cryptocurrency

- Reduced Cryptocurrency confirmation to 1 from 3

- Simplified website UI

- Fixed reverse search issue

i think triles should be free for anyone, i can get it for 2 dl so if i think is not worfet i am not going to by it. . if person tryes the service and is happy with it he or she may buy for longer term if the trile is free for the few days. . but this is how hf works so i am not going even to bother to buy this service because as a professional service trile should be supplied.

We do offer a trial service for vouch copies only and for specific user groups. If we offered everyone a free trial without any verification method or process, we would never get sales as people would just create new accounts everyday.

I have an account on your website with name morpheus. And I have just 1 account here. Earlier I bought a pro account in which 10 API searches are free. After I made 1st search my all remaining searches went to 0 and there was nothing in logs. So I created a ticket and you asked me for selly ID

Order ID: d5023466-d4f9-4307-bf6b-09b9355eb779

But I got reply that this ID is not associated with my account. So I asked on ticket that I wanted to purchase 1000 API searches. I got an address to pay in reply and which I did.

The transaction ID is:

<https://insight.bitpay.com/tx/1e1974cba88a3bbb42ec9b0a5afa0f5a47d6362a592eb24d8567f6f76d279c16>

Today I saw that the ticket was closed and I had 1000 API searches in my balance. I made 1st request and got results. And just after that I saw all API balance went to 0. And my closed support ticket disappeared.

Then I created another ticket explaining the issue but after few minutes that ticket also disappeared.

Please don't give me again this reply that this TXN is not associated with the account as I use only 1 account with your website and I need you to fix this ASAP.

You must be delusional. You have a total of 3 accounts. I know this because you created 3 tickets from 3 different accounts with the same story about the API queries with the same transaction ID. We have warned you of multiple account usage. We will not help you maintain track of multiple accounts on our site, that's your problem.

Furthermore, having multiple accounts on site is against our terms of service. If we see that you keep requesting on your other accounts this is the case and you certainly do not have multiple accounts while posting from 3 different accounts, we'll just go ahead and ban all your accounts and mark your details as fraud in Selly.gg's database. We clearly stated that this was against rules, please do not raise this question with staff again.

Either you have a mental disorder and you have multiple personalities, or you're trying to scam us to get the api queries applied to 3 different accounts. We're not stupid.

This is your final warning.

Edit: We never deleted any tickets, we simply closed them. They're still in the system, I have it all up on my browser. I can see the 3 different accounts.

Can you please post the usernames here of my so called multiple accounts with proof? And why would I create multiple accounts when I have bought API access from one. Maybe you should check your website's backend for some kind of bug or something.

And again I would like you post the proof here of my multiple accounts from which I posted 3 different tickets.

Also if you suspect multiple account why not give me access to the one I have with API keys. Is it not simple?

Our backend isn't doing anything like that. It's unique to the browser and ip address. Can you send me your IP address through dms.

Either you're logged into multiple accounts in the browser and PHP has assigned multiple sessions to your browser, or you magically found a 0day in PHP

EnigmaF0x - April 21, 2018, 8:24 am

I sent you my IP address in ticket and you banned my account. I am telling the truth that the other 2 accounts except morpheus is not mine. It would be really good if you check the issue.

weleakinfo - April 21, 2018, 8:25 am

(Apr 21, 2018 08:03 AM)EnigmaF0x Wrote: [\[CITE\]](#) There is some issue with your session maintaining. Please check if your backend code generates same session cookies for 2 different users. I am logging in with morpheus account and after few minutes when I refresh I am logged in to different account. I can show you on team viewer if you do not trust me.

You almost got me, I'll give you that.

I checked the access logs and found out what you were doing. We may not log specific user ip addresses, but we do keep access logs from nginx to track things like this and debug our apis.

Here is the log: <https://ghostbin.com/paste/9fe46>

Let me explain what you are doing.

At the top we see you access the first ticket, then you logout and login to another account. Then you go to the second ticket. Then you logout and then login to the third account and go to the third account.

I would suggest next time you use different ip addresses to pull this off, but we would have caught you anyways since this is a stupid scheme.

All your accounts, ip addresses, and paypal emails have been banned and marked as fraud.

Also don't say that it's another user on the VPN. We see you immediately logging out and logging into another account. We know it's the correct accounts because you're access the ticket and the url has a unique id and secret.

EnigmaF0x - April 21, 2018, 8:40 am

Well you will only believe when actual users of those 2 accounts will notice that something is wrong and contact you here or in ticket system. This is a 10\$ thing and if I have 1000 search balance if one accounts I see no reason I will contact you to transfer my balance to one of my other account.

If I needed to transfer my balance on one account to another I could have asked you to do so without all this drama you should understand this. And instead of being arrogant about this you should have checked your backend code if there is actually some bug. I told you I can show you on team viewer too that I will login in my account and after few minutes (10-15) when I refresh I will be logged in another account. But you are too arrogant to investigate this and banned my account instead.

BTW good luck with your website and sales. I guess I would have to find a better service with better support.

You're the arrogant one. Anyone who knows anything and has basic logic, can see that you logged out and logged in immediately and accessed other tickets.

Please go use another service, because we don't want scammers here.

For reference, your ip addresses and emails have been marked as fraud in the merchant fraud database.

Very well I don't care. And I am not the guy who would scam you for 10\$. I told you I can pay you again in ticket if you fix this issue. And as I told you why I would be scamming you to transfer my funds to another account.

Also I offered to show you proof on Team Viewer but you simply banned my account. So from this conversation everyone can see who is being arrogant.

The logs you have posted are of just now when I logged out and again in, when I was trying to recreate/replicate the bug so I can tell you what is the exact issue, and at what point the switching of account takes place. If you can however check that I just browsed the support page and viewed the ticket not created a new ticket. So the logs you posted do not show that I logged out and created different tickets.

Also if you take a little pain and check actually when I created tickets (I don't know how your backend is but you can check exact time when the ticket was made and the check in logs or something) which are from different accounts I never clicked on logout a single time. You won't find any logout request from my IP at that particular time when I created tickets.

If you really check this out you will see I am not lying and in fact there is some session issue with your website.

Still being a snitch?

Aren't you banned from HackForums? I think you old account was D0ksi, I think a mod might want to check on that

Last time I checked, We Leak Info was owned by Adam Davies, a snitch and scammer who asks people to fake DBs for him. I mean I don't know it says Adam Davies on all the server hosting information, whois, and payment systems with your address sir.

By the way, we don't receive data from TeOz and all the fake ones he kindly pointed out was given to us by you. Which is like 3-4 databases. Don't get too salty Adam, I'm sure you'll have a lot of explaining to do to the NCA

Review: I bought a week to test it out. Was working well for the first 2 days then password got reset somehow and i missed out on 4 days. When i took this up with the Op , he told me

"That's the incorrect information. Please do not try to hijack other accounts through support. If you have multiple accounts, please stick to one account. If we do see that you have multiple accounts in the future, we will ban all of them including your IP and paypal email."

Although i have no reason to "hijack" other accounts. I provided him with my payment email address and paypal order no. Overall i rate this as a poor service. Not worth the money and hassle to deal with support. Oh btw , next time add a recover password option on your site.

I received a vouch copy and all I can say is that you won't regret purchasing a subscription on this website.

I've used some similar websites / services in my days but this one is guaranteed the fastest one and guaranteed the one with access to most dumps.

The website itself is clean and very easy to use. No captcha is required once you are logged in which is a big + (plus).

I will definitely purchase a subscription once my trial (vouch copy) account runs out.?

Is this happening on Selly.gg, the pop up window with the payment options, or on Paypals' website themselves? If it's Paypal's own website, you need to contact Paypal for further assistance.

We haven't added any description to the databases on our list. If we did, it wouldn't be the entries but a short description about the data breach. We do not give out raw outputs from data breaches, you can only search through all of them at the same time. You cannot search a particular database or filter through the results for certain databases. We don't support this due to possible abuse.

You can search and find out if your information has been in any data breaches. If so, you can purchase a plan and view the raw data, the information in the breach. This is to help individuals secure themselves online before any malicious actors can gain access to your accounts.
