Huge sale on this laptop at the minute, best price by far if you're looking for an affordable portable gaming station. Just picked this up for myself too.

£829.99 down to £599.99

Yeah it's a bargain, returned my laptop the other day to amazon due to faults and just spotted this one, copped it straight away. Less than £100 more and i'm going from i7-6500U and 920mx to this, massive upgrade

Mine due between Tuesday and Thursday next week since I'm ordering outside the UK, can't wait to get it

Got mine today, I'd recommend uninstalling all the games, and unwanted applications e.g. Anti-virus. It will slow it down.
