EnderBugg - November 23, 2017, 4:09 pm

I've been wanting to root mt Moto G4 play for a while now and I need some way to do it. if anybody has any answers, let me know!

Marduno - November 24, 2017, 7:51 pm

KingRoot, google. Plenty of youtube videos available as well i believe.

I've tried, but it doesn't work.

Rixmainn - November 26, 2017, 11:20 am

Hey EnderBugg, you have to google it and then they will tell you to install a custom recovery like twrp. Easy with plenty of smartphone

crosoval - November 28, 2017, 5:56 pm

try kingoroot real. download from their website. many fake apps in play.

TheBaws - November 29, 2017, 10:32 am

If you want to root it, you should first of all unlock your bootloader. Afterwards you're ready to root, by installing a custom recovery you should use TWRP

You can do that by using ADB fastboot

Search on google how to install TWRP recovery and you will easily find a guide on how to do it

SO_SO_HAX - December 1, 2017, 3:33 pm

I personally would head over to XDA developers and pick up a program that has a GUI and in a few clicks and done.

Found this on xda though.... "NOTE:0) Be running Marshmallow (Android 6.x) stock ROM, at this time Nougat (Android 7.x) is not working via any method. As of 7/18/2016, Amazon ad-subsidised Moto G 4th Gen devices cannot be bootloader unlocked, therefore they cannot be rooted. Sorry, Lollipop and newer Android security changes pretty much put an end to that."

If your phone is not affected then carry on to unlocking the bootloader, then to root.
