Thread: [How many are sitting on losses right now?](#)

normalguy - November 25, 2017, 1:36 pm

I'm just curious if anyone is sitting on any losses during this enormous bullrun from BTC? Everything is freaking high asf, impossible to be in loss.

SIM-403479 - November 25, 2017, 1:39 pm

Started at 1k now at around 4.2k.

Only seen these profits in the past 2 weeks tbh.

Are you one of those so called Eth/BTC hodlers?

"So called" like it's something stupid lol.

Just hold the coins as they will just keep grow.

Since this BTC bullrun nearly every alt have dropped heavily, so I'm curious on how much you guys have lost and what coins you've been invested in?

I bought BAT in the 6000 SAT range and it's dropped down to 1900 so I'm down like 70% or something.

If it wasnt for the extremely high value in Bitcoin right now my portfolio would be cheap as fuck. ?

How about you?

Honestly I feel your pain. But you can only learn from now on. When I started in crypto I invested in a high (just like you did) and lost most of my money. Did I sell my investment? No I did not. I held it (it was ETH). So a few months pass and guess what now im making money.

BAT was overpriced. You bought at the high. What can you do? Sell or hold. If you think BAT will die, sell. If not just hold on. Stop thinking about it so much.

This why people always say to not invest more than you are willing to lose. And also why people say to do your own research before investing.

Learn. Learn. Learn. And I promise you will make gains. GL

Probably the 2 best holds in crypto tbh.

Eagerkid - November 25, 2017, 1:50 pm

Thankfully I dont invest in shitcoins aka altcoins. So I am in the green, especially with this ethereum spike

Acia - November 25, 2017, 1:50 pm

i bought BAT for 200\$ and right now i'm down 40\$

HARDSTYL? - November 25, 2017, 2:09 pm

Glad I got out of alts a few months ago. I felt like there time was up and put everything into BTC/ETH. Turned 2k into 7k. yay

????? - November 25, 2017, 2:12 pm

started with \$3k close to upwards of \$10k, thanks ALIS
first bought @ 2200 sats
its highest was almost 12000 sats
sold high bought low period of 4 days

- Lost \$1k on BAT myself, big mistake

Don't listen to this 'kid'. He doesn't know what he's talking about.
All my cash comes from trading altcoins, your own fault for not having proper risk management and losing your money on hype coins.

I'd say the generalization holds true

DontQQSoMuch - November 25, 2017, 4:30 pm

Have been holding plenty XMR since \$90, bought Ethereum when it was at \$350 and Bitcoin when it was at \$5,8k and Neo at \$29. I'm pretty happy.

Decim - November 26, 2017, 12:28 am

Only bad choice I've made so far is STRAT. But I'm holding for better or for worse.

ganstephanos - November 26, 2017, 12:34 am

This is why I don't hold anything over a few hundred on shitcoins.

Huge stock of BTC, XMR, ETH, BCH.

Rest are diversified in online wallets - I daytrade with a frw grand and keep the rest in ETH mostly

Doubt anyone would like to share the big losses with you.. But.. Well idk what to tell you man.

When you throw all your cash to a REALLY unknown and useless shit coin, what do you expect?

Next time you better look into coins with better support than 3M 24h volume..

EziNet - November 26, 2017, 5:31 am

I dumped my alt and holding BTC.
