Thread: [xProtect Crypter - Plugin system, Compression, Encryption and more](#)

Edge of Nowhere - November 25, 2017, 2:02 pm

xProtect is a portable executable protector that encrypts and keeps your data safe.

It supports various features for you to customize exactly the way you wish to protect your file(s).

Features:

- No dependencies (No frameworks needed, everything is bundled in the protected file).
- Small loader size (~122kb without icon, without version information and uncompressed).
- Plugin system (Add additional functionality to the protected file).
- Double compression (You may compress with native APIs, then compress with either UPX or MPRESS. ~20-35% smaller).
- Single/Multiple encryptions (protected file can be encrypted by one, or multiple encryption algorithms).
- File-less injection (No files are written to disk, everything is ran from memory).
- Assembly information cloner and custom assembly information.
- Able to customize the way the protected file is stored (Split, Encrypt and store protected file to make it more difficult to reverse).
- Supports command line parameters.
- Require protected file to be ran as admin.
- Execute the file hidden (If it has any windows).
- Prevent protected file from running more than once.
- Waits a certain amount of time before executing.
- Waits until computer is idle a certain amount of time before executing.

Live preview:

About the plugin system:

Adding a plugin to the protected file gives it additional functionality that was not included in the core.

You can decide to run the plugin before, or after the protected file. So you can run it, when you want.

It's functionality is limited to what you think.

Tested and works with:

- Bozok.
- Darkcomet.
- netcat.
- Putty.

Regular (Price per crypt, no builder):

- 1 = 10\$ USD\$
- 5 = 45\$ USD\$
- 10 = 80\$ USD\$

Premium (with builder):

- Unlimited = 125\$ USD

Available plugins (50% off if bundled with Premium):

- (Free) Example plugin v0.1 - Allows you to create your own plugin.
- (30\$ 15\$) Buster v0.1 - Monitors clipboard for Bitcoin / Ethereum addresses.

Accepted Payment Methods:

- Bitcoin (BTC).
- Ethereum (ETH).
- Monero (XMR).

Additional information:

- If you're caught reselling xProtect without my permission, you will NOT receive updates and you will be banned from this service.
- I will only provide support for the functionality of xProtect and it's sub-products.
- I will NOT go first.
- No refunds.

3 vouch copies available to Uber/Leets (Ofc has to follow the T.O.S.).

N00T - November 27, 2017, 8:30 am

I will gladly take a copy and post the results on my thread if you have nothing against it.

Sent you a PM, as well as anyone that contacted me.

Vuln - November 29, 2017, 8:18 am

Good luck with your sales. What exactly justifies its high price?

Edge of Nowhere - November 29, 2017, 9:46 am

I think my dedication to the project is worth that. Also, filters out potential leakers. People will be less likely to leak if they pay a bit more.

Prices are subject to change, but for now, they motivate me to keep working on the project.

Edge of Nowhere - December 1, 2017, 1:14 pm

Prices reduced by 50% for the month of December!

Edge of Nowhere - December 17, 2017, 12:50 pm

Less than two weeks left for the promotion, get it while it's still available.

TheWolf™ - December 17, 2017, 2:57 pm

Any vouch copies left? I'd love to try and give a review.

Cheers, ?

Mustys - December 17, 2017, 2:59 pm

I would love to get a vouch copy, thank you!

Hook me with the vouch copy ill take a look and review it thanks

Vyxn - December 18, 2017, 6:21 am

Looks promising and the UI is indeed user-friendly. Good luck on selling this and I hope you get what you deserve.

Vouch copies have already been given out. Sorry for the inconvenience.

Edge of Nowhere - January 10, 2018, 3:33 pm

Original post updated. New prices, new preview and new payment methods.

CrudeCoder - January 15, 2018, 5:31 pm

This software is very well planned & thought out I have been helping the old boy test it and it's very reliable & stable.

luimeng - September 17, 2018, 7:56 am

how much is this product selling for now?

Lextian - September 18, 2018, 12:33 pm

Sent you a PM, i wanna test this out, get back to me.

What is the price?

Edge of Nowhere - November 10, 2018, 6:40 am

(Nov 10, 2018 07:04 AM)Hollow Wrote: [\[CITE\]](#) What is the price?

Ive got it appraised by multiple people, most say anything between 500-1000\$ USD.

I'd accept any reasonable offer.
