Thread: [Shared Hosting or Cloud Hosting?](#)

Gatot Kaca - November 25, 2017, 11:43 pm

So im planning to make my own porn site . what type hosting should i take ? shared hosting or cloud hosting ?

some people said shared hosting will not stabilize if you had a lot visitor . and i dont really know about cloud hosting is .

please share tips . thank you .

I think the term you're looking for is dedicated hosting, unless you truly mean cloud hosting.

Either way, the answer is anything but shared hosting. Usually the hosting rules are more strict on shared, and likely to prevent you from hosting adult content.

Agreed. Be sure to check the ToS of the hostingprovider you decide on - many don't allow adult content.

Also, you might want anonymous, DMCA-ignored, offshore hosting for a project like this. I suggest going with Abelo host.

Yes, biggest bit of advice to take away from all of this is getting the hosting provider right as they don't all allow you to host pornography. I'd also suggest getting a dedicated server compared to shared hosting for this.

Eagle 95 - November 27, 2017, 11:41 pm

Don't get shared hosting for such a large project. I'd recommend getting a dedicated hosting. Also, make sure to check hosting's policy what you can and what you cannot host there.
