Thread: [Pentesting Service / Web Hacking Service.](#)

Meloz - November 27, 2017, 5:08 am

Hey guys, no fancy thread designs, straight to the point. I'm in need of extra cash as I gotta pay a few bills and currently I just quit my job due to some problems.

This is a service were I will test YOUR website for vulnerabilities, and inform you about them.

Spoiler ([Click to View](#))

Message me a targeted website and I will attempt to pentest it.

Money will be paid upfront, if you dont trust me the money can be sent to Factor8 as middleman ("escrow"), the fees being on you.

Accepting: Bitcoin & ETH

La Vida Loca - November 27, 2017, 5:59 am

Why would anyone pay any money up front to an unupgraded user with no previous pentesting portfolio?

Even paying the middleman fee would be beyond stupid when your success isn't guaranteed by anything?

So in your autistic mentality you believe just because I'm not upgraded I'm less trustworthy and less skilled than upgraded members? You're wrong, infact some of the best members in this community are nonupgraded members, so get that straight. I'm not going to be putting a "Portfolio" incriminating myself of what I've hacked and what not. The payment will be made to an ex admin from this forum, if I dont succeed you will receive a refund. But the reason I ask for upfront payment is to avoid me from doing services to time wasters like you.
