Story about how I sent 500\$ to Junx => <https://hackforums.net/showthread.php?tid=5754591>

He (real Junx) said that he will send me 500\$ in btc that day, then I asked him if he can send PP \$\$ instead of btc, he said he will in 2 days. 9 days passed, no pm, no reply, no money.

I guess now real Junx "scammed" me. <.<

3.

He said in 2 days. 9 days passed already...

4.

Here I asked him (25.11.2017. 02:10 AM) when he will send money.

5.

He saw a message and did not answer me.

Last time he was online => 11-26-2017, 10:47 AM

6. My inbox. No reply from him.

If he don't have money on his PP, he could send me at least pm that he still don't have, but he didn't do it.

Junx, you could at least reply me on my messages tho.... I mean even "Hi, I give you back btc, don't have pp"...

EDIT 2:

Do you remember user Mario? =>> <https://hackforums.net/member.php?action=profile&uid=137863>

He's banned because he changed name to "Junx"... and scammed one guy, and almost scammed me, but he didnt. I sent BTC to real Junx address.

That user Mario is now user Fidler =>>

<https://hackforums.net/member.php?action=profile&uid=2611374>

How do i know that? Because of this =>> <https://prnt.sc/hg9f8o>

I got this message yesterday from Junx => <https://i.imgur.com/vTclaRJ.png>

In that picture you see btc trans. blockchain.info/tx/569a5f8bf8270....

The only guy who knewed about correct transcation was Mario. How? Because when he changed name to Junx and after I was tricked to send BTC, I sent him message with transaction code. So he was the only guy who knew about real transaction code.

After I made post => [url= <https://hackforums.net/showthread.php?tid=5754591>[/url] That guy Fidler probably sent pm to Junx <https://prnt.sc/hg9f8o> and probably Junx returned him MINE 500\$ btc and now he's confused about that how Fidler got real tx.

But there is one thing that I don't understand... Why real Junx would send MINE 500\$ of btc to some guy Fidler, when he already agreed on forum (<https://prnt.sc/hhavue> and <https://hackforums.net/showthread.php?tid=5754591&pid=56235627#pid56235627>) and on Discord that he will send me 500 BTC back or he will give me 500\$ in 1 day or 48 hours.

My opinion is this:

Mario, Fidler and Junx are same person.... And this is some really smart scam...

that's nasty....

Karma will get him for sure, hope he gets banned.

Why would he even send you \$500?

And he didn't really scam you

.....because he was sent \$500 in btc.

There was no real deal as he was originally talking to an impostor but Junx still agreed to send him PayPal funds....

He really didn't scam me, you are right, but can you tell me how to name this thread?

sLACKER - November 27, 2017, 3:17 pm

Technically he did scan him... If he admitted he sent the funds to his btc address and agreed to reimburse and has yet to reply or reimburse..... Pretty self explanatory...

My concerns is this tho... I'd junx didn't send the btc Addy, why would some one else send his btc Addy if they trying to scam? I'm confused?

What happened was OP didn't trust the BTC Address of the impostor and sent the funds to one that Junx had sent him previously.

popir - November 28, 2017, 3:05 am

i mean i know about that case and in my eyes now it is a "scam" i mean

1. he said he got the btc and asked Edo to refund it to his btc.
2. He accepted the deal for "the mistaken sendd btc - for his paypal"

Would he said sry i never got the BTC or whatever i would understand him but agreeing to send him back or exchanging it for paypal makes it to a deal

Hope u guys resolve the issues

SIM-2223238 - November 28, 2017, 1:48 pm

Junx doesn't have to refund you but this'll make him look like a asshole.

Oh ok glad that was cleared up I was like WTF lol

shreder - November 28, 2017, 7:57 pm

well technically it wasn't a scam until he agreed to send it back because he didn't need to idk why you just sent him \$500 you should have just blocked the imposter.

EdoFazlinovic - November 29, 2017, 1:51 am

I guess you didn't read the story what i posted...

I already made a successful deal one day earlier with Junx and day after fake Junx sent me a message that he have again 500\$ to exchange so I just sent 500\$ of btc to old real Junx BTC address.

Mario aka fake Junx is banned now because I got tricked by him and Junx agreed to send Paypal money instead of giving BTC back. When he agreed to send back, he made actually made a deal.

I was about to get scammed by the Fiddler guy which is why I didn't pay you back - in the first place I didn't need to, but I was being kind. Check your PayPal I've sent you \$575..

"Mario" (Impersonated me at the time) asked Edo to send him \$500 BTC for \$575 PP, Edo sent to my Old BTC Address [I have access to it]

Fiddler [Marios alt HF acc] then PMS me the transaction ID because he realises the \$ has been sent to my old Address

So I paid Fiddler back \$500 BTC (Got scammed there)

Then I thought the deal was over and that Edo was just trying to scam me (HE WASNT) when he pmd me saying he sent me the money but I see what's happened now

So I paid Edo \$575 on PP just now.

So from what I understood, like a TLDR, you are out \$500 BTC because of the impersonator?

Yeah, Edo is trying to be a good guy and give half back which is nice to see but I really don't need it and it's not so important to me.. Just glad that all of this is sorted, my fault for misunderstanding some parts of the situation as well.
