Thread: [Ub3r Color Tag](#)

Zayn. - November 28, 2017, 12:58 pm

I don't know if it's just me, but I have a little hard time reading a user's username if it's an Ub3r compared to if it's an L33t or default.

Therefore I was wondering if Ub3r's color could be a bit brighter, something like #76acff. I'm not sure if it's just me, though.

Aveling - November 28, 2017, 1:16 pm

It is not just you, if I recall correctly the rank colors used now are from the old times, later they used this color with a border/shadow, and now we use the classic colors again. When I'm at a desktop screen the name is easy to read but when I'm browsing with my smartphone it takes a few secs to read the name, although that could just be my eyes being the issue. That said, I personally prefer the old color a bit more, it was easier on the eyes.

Riyu - November 28, 2017, 1:17 pm

Yeah, the color is a bit annoying but it's up to Omni.

Cyber - November 29, 2017, 9:49 am

They can get annoying but I guess it depends on the screen you're looking at. My macbook doesn't have any problems but my MG248Q it kind of sucks.

M?xim - November 29, 2017, 11:56 am

Oh it has changed from #00aaff to #0066FF.

Vince - November 29, 2017, 12:17 pm

You must be damn blind if you can't see this color lol

Omniscient - November 29, 2017, 1:55 pm

Yeah, the blue is a bit dark and I was planning on adjusting it.

Mr. Robot - December 1, 2017, 2:27 am

I kinda like it, but it can be occasionally depending on screen size.
