Selling Ma\$\$ Domain SMTP Scanner/Cracker

Compatible with Linux - Centos | Ubuntu

Why buy SMTP from others when you can scan on your own ?
You could also sell the results to earn some extra BTC

I also got vouch by ATN moderator DoMHex

Quote:Something Special for ATN Crackers, Awesome Tools. I preferred you to buy this tool

Good Luck with selling.

thread: <http://www.altenen.com/showthread.php?t=2081120>

You can scan your own on SMTP with your own desired IP range.

For example lets say you input an ip 47, it means that it will scan for open port smtp from 47.0.0.1 - 47.255.255.255

Scanner will scan whole ip range and then start cracking.

The script does all work from scanning smtp open port to cracking.

Here I started cracking for SMTP with default password list created. You could also use your own password list if you are confident enough that you going to get enough hits ?

Since many people ask for pic there you go

When you hit a cracked SMTP it will be saved in file cracked.txt as below:

Price \$150 BTC ONLY!

ICQ - 726813141

? Thank You ?

people always selling scanners but the question is how are you protecting yourself from getting a knock at your door from the Authorities? how are you paying for your VPS so you don't get caught? basically how are you hiding your tracks? it's easy selling a scanner but what protection do you offer your customers? and this is a big thing i never hear anyone talks about you can't just be going around scanning and cracking smtp's unless you wanna go to jail

chiefjoshua - January 6, 2018, 11:08 am

Please can anybody help me with python smtp scanner bruter and zenmap tutorial...could be via tv....I pay \$\$\$ Please contact me by skype: chiefdariye

When a link is censored doesn't mean you should bypass it.

And this has been sold way too much on this forum.

Dimeblade - April 1, 2018, 1:14 am

BUMB contact ICQ and paste me the url of this page in ICQ msg.

I have PM you regarding this incident.
I lost my ICQ access as free online sms receive site was used for registration with my ICQ.
call me dumb but all I wanted was a temporary ICQ for sales.
PM me to get your product.
The above picture you posted is legit and was likely ripped \$100.
please PM me ?

frankhot12 - July 23, 2018, 7:53 am

bro PM me your contact number because I want to buy this software

This is not sorted out sir. I contact(PM) guy dabenz at 06-27-2018, to receive his product but was unable to hear from him. I am hoping for a reply or PM from him since he lost valuable money for nothing.

For future sales I will be more than happy to teamview everyone before sales to show live performance of scanner so there is no mistake in end product you receive.

? ? Thank You ? ?

dabenz - September 15, 2018, 5:46 pm

He has refused to respond to my PM

Now You have set you last seen as "Hidden". Fucking Ripper

Yes I did lol man. I have been out all day and am online from mobile.
You see the file is not in my mobile like I am gonna connect my roots and transfer from my mobile for scanning lol.
and stop calling me ripper rippar ripper.
I will PM ya tomorrow with whats promised.
sorry for your confusion.

dabenz have some patience I wait many months for your pm and finally lets sort this out. But not right now as im away for some work related to real life job (not virtual shit) .
tomorrow I promise

Thank you for the comment and I hope you take back all negative comments you thrashed to my thread.

Back.

Fucking sent you PM with download link for scanner/cracker.
I wait months for you response so now there it is no waiting needed.
Enjoy the SMTP SCANNER

Regards,
?

why wait LOL man. After I PM around 4-5 months later he responded again.
So now when he arrive maybe 1 year or later he must receive his end product.
I have already sent him PM with download links.
I hope he enjoys the scanner.

Regards,
?

!!!! NO LONGER ON SALE !!!!

Not being able to be mostly active here I decided not doing any more sales for sometime. For the current product I stop my sales completely and no sales will be done for this "Mass Domain SMTP scanner".

When I will be back I will comeback with some nice coded and very very fast scanners.

Quote:I will be back with multithreaded scanners/crackers for different protocols.

Example:

FTP
SMTP
RDP
SSH

etc...
