IRC Based shell scanner Revslider

Tired of searching in Google with dorks and exploiting each 1 by 1 ?

Let me give you the perfect solution for those who interested in getting shells just by entering your dork.

This scanner only gives you .php web based shells

Compatible with Linux - Centos | Ubuntu

Below the pic shows status of scanning. This is how its going to look in your irc channel after executing script and feeding dork.

Note: I have already executed perl script in my root and also entered my revslider dork in IRC channel and I started scan and after few minutes it shows stats of executing payload.

well thats how your channel is going to look but the results will be sent to you in PM.
The bot will auto PM bot admin with shell results like below pic

Currently scanner has Google search engines only.

I will offer free root access Centos/Ubuntu to the first 3 sellers

Price : \$75 BTC ONLY!! (price is only for scanner perl script)

ICQ: 726813141

Available Root Access for executing perl script - PM ME for detail or contact me in ICQ

1) 2CPU Root | 4GB RAM - Centos / Ubuntu

2) 6CPU Root | 32 GB RAM - Centos / Ubuntu

3) 4CPU Root | 8 GB RAM - Centos / Ubuntu

ROOTS WITH CUSTOM BANDWIDTH ALSO AVAILABLE 800+ mbp/s
you can run any thing in this root box from botnets to scanners.

NOTE: !! ANY ACTIVITY IS ALLOWED IN ROOT BOX !!

[b]Root Will hold 15 days minimum, if not I will give another root.[/b]

CONTACT in ICQ or PM ME for more info
