FAQ ([Click to View](#))

Does this work with any gun and any class?

Yes

Any vouch copies?

No because I do not have any license system setup with this.

Does this read memory or anything invasive with the game?

No, it is a color based aim-assist but it is fast.

Can I use this in PVE and PVP?

Yes, but if you abuse it in PVP and get banned know that you were more than likely reported multiple times, you will not get an automatic ban from using this.

BTC, ETH and LTC accepted only! (\$10/lifetime)

haha love the name, I'll probably purchase this after a video has been posted.

I've seen previous color aim assists on overwatch but they suck ass

Interested in seeing that video, how long have you been using this?

**M O D E R N** - November 29, 2017, 8:38 pm

Video has now been added to OP

I may be doing some crucible in a bit, ill capture some video when I do!

**XXX** - November 29, 2017, 8:50 pm

looks cool. i'll be waiting for the pvp footage aswell

**M O D E R N** - November 29, 2017, 9:25 pm

Here is some PVP footage now (couldn't add to OP due to video limit)

Is the fov and smoothness hardcoded or is this customisable by the user?

You will be able to set the sensitivity (smoothness), fov and aim coords.

**ruGaming** - November 30, 2017, 12:52 am

Can you use this in fullscreen?

Of course

**BoliBerrys** - December 1, 2017, 7:46 am

In what language is it coded? Or is it AHK?

Current version is AHK, this weekend I will be releasing a new updated version that will be written in c# and will have a nice gui for changing settings.

**Zombee** - December 2, 2017, 7:18 am

Vouch! Bought from OP and it works perfect!

**Loathe** - December 2, 2017, 11:12 am

user is selling a free release lmao

Exactly what I was thinking. Is anything different in this "pixelbot"?

**ruGaming** - December 3, 2017, 1:20 am

waiting for response; sent payment

I compared what I received to these files and can say that he is reselling a public cheat. He has ignored two of my pms in regards to this. I'll be opening a dispute soon against OP.

**CouncilSlayer** - December 3, 2017, 10:39 pm

Well, anyone have good settings for 1900x1080? Can't find good settings that work

**M O D E R N** - December 4, 2017, 12:37 am

New version of this will be out very soon. Holding off on sales until I release it.

New version does not using AHK and will be a bit more user friendly and easier to config to your liking.

Also adding 2 experimental macro features..

Adding onto this; I purchased 3 days ago and still haven't gotten a PM back from OP.

Sweet deal. Jackwagon

You have people who have bought already and you haven't answered, and you are now remaking it to not be AHK? Fishy...

They have been contacted.

Moving to C# was always planned.

You haven't explained why you sent me a public build that was on unknowncheats. I have asked for a refund now multiple times and you have kept ignoring those PMs.

Sales are final and I told you about the new build coming. Also a paypal dispute was opened saying it was an unauthorized charge, which is a lie unless it's not your account.

You still sold a public cheat tho ?

**CouncilSlayer** - December 5, 2017, 7:46 am

What are everyones settings for this? I have tried the settings in the folder, but it still snaps to the top left of them. It's not as smooth as in the video
