Thread: [\[L33T/3PIC/UB3R\] Infinitum's free design service](#)

**Infinitum** - November 29, 2017, 4:28 pm

Hi. I made a similar thread a few months back. I ended up not doing orders and asked for the thread to be closed due to some personal issues.

This is the same thread, except that I'll actually do the orders.

I'll naturally accept unupgraded users if the idea interests me, but the main audience here are the upgraded people, aka those who helped the site (if that makes any sense).

thread design coming tomorrow evening. I promise.

"I'll try doing anything you want, I don't guarantee on some things that I'll be able to make it, but I'll try my best.

Thanky ou for providing this service.

I am not going to use the template because all I need is my current sig but instead of it being the gold L33T color I want it to be the UB3R color ^\_^
