Or the guy who sold when bitcoin was only \$10,000

When bitcoin is \$1,000,000 per coin, people are going to be kicking themselves.

That sucks dude. \$100 000 worth of bitcoin you had

Ben Shapiro - November 30, 2017, 3:16 pm

SR is gone forever, feds already sold the coins... There is absolutely no way to retrieve them and I would caution you to not visit any site claiming SR's namesake.

Thank you for your donation to the intangible coin pool! Thanks to you the overall volume of Bitcoins has been decreased and my coins will be worth more!
