Thread: [Why are rich people selling ebooks? They scam?....](#)

Grand Priest - November 30, 2017, 10:38 am

Hello i was wondering why rich people sell cheap ebooks and waste their precious time and knowledge?

I personally don't have any interest to make these amounts and waste my time do they just scam or? why are they not banned if that is the case?

hackforums.net/showthread.php?tid=5760349

In this thread he says that he has multiple online stores that make over \$10,000 every day so i assume \$20,000 - \$50,000 every day because he has a total of 8 stores online.

So roughly \$140,000 - \$350,000 every week
or \$560,000 - \$1,400,000 every month

Why would he even care to sell an ebook for \$29.99

Could someone please explain cuz if it's legit i obviously buy his knowledge for those funds... but seems fake

Edit: found this and made me laugh hard: [youtube.com/watch?v=tE9wfnWBI5c](https://www.youtube.com/watch?v=tE9wfnWBI5c) answers what i'm asking here...

Jake???????????????? - November 30, 2017, 10:39 am

It is fake don't waste your money on it. It's just a marketing tactic, 99% of HF are broke bois

<https://hackforums.net/showthread.php?tid=5752213>

short answer yes

MarSy - November 30, 2017, 10:42 am

Yep don't buy them

most of the ebook sellers are broke kids who don't make money otherwise.

They fake earnings and vouches and call it "marketing".

Hustla - November 30, 2017, 10:45 am

Unethical route to make cash is to sell eBooks.

Grand Priest - November 30, 2017, 10:45 am

... alright but why is it allowed or is it something not possible to keep track on what is real and what is not?

i also see on some ebooks many positive reactions it are accounts from themselves?

A lot of them are paid for, multiple accounts, or friends of the person selling. A good rule of thumb is to stay away from ebooks all together as they will more than likely be a scam. If they have a working method there's no way to know for sure if it's going to work for you or how many of these copies they gave away; it could be a dead/dying method.

Baba Yaga - November 30, 2017, 10:48 am

Long story short, it's a money aspect.

Authors of eBooks will write what people want to hear, and some people are gullible into falling for it and open up their wallets to them.

On the forum side, the admin gets money for every sticky purchased for marketing their eBook.

So bottom line, this won't go away as there is too much money involved in the business.

Mostly it's their friends faking paypal screenshots.

i can imagine a kid

alright then...

I found this tough, basicly confirms what is being said here so i'll stay away from ebooks.

Well. You could have always PM'd me to confirm. I have 8 stores totaling about 1.1m GROSS monthly. After fees, product, advertising, VAs, paying workers, I take home about \$3750 a month. Of course I could do things to increase my profit margins, but I am in a good state and customers are happy.

So yes. My stores bring in \$1,100,000 a month. I do not make that much. People can make a whole bunch more than me by finding better profit margins, doing all the work themselves, and more. I am growing a multi-niche brand, so the lower profits, but happier customers works well for me. Especially when I take the next step and merge the stores

Then state out you earn almost 4k /month instead of that you earn \$20.000+ every day because of your stores that is a major difference.

It's misleading people simple.

\$48,000 a year, after taxes, is not bad. This is with me working 3-4 hours a day. I could easily double this with 8-10 hours a day, but I am comfortable where I'm at

It has not taken me this long to reach this point. I have had years where I was making a lot more. This is where I have settled for now due to the low maintenance of the stores, and the nice take home for the hours worked.

Still telling people that an your 30\$ ebook can free themselves, change their life and give them financial freedom is straight up bullshit.

Do you even know what financial freedom means you havent archieved it yourself yet.
Someone with \$1.000.000 in the bank still can't live like he has financial freedom at least not for lifetime and you earn max 4k a month just stop man comeone.....

The legit ones usually sale for high amounts \$400-700 range. Even at that you want to be careful because some people are great at marketing and catching people's eye. Honestly just steer clear from eBooks in general. It's a risk.

Honestly some of the eBooks are legit even if they're cheap. It's just that methods provided are skewed or would in reality take you a massive amount of time and investment to get to what they're advertising. Like I said it all depends. It's all a gamble.

Like I been saying it's all a gamble with these eBooks. Risk it to win.

207120019 - November 30, 2017, 2:27 pm

I think some are real, but only after you have other free content first to sell them.

Like if you have a travel blog where you post new articles every week with good content.

Build up 100,000 visitors, and then build a mailing list and then sell them your ebook.

Or if you have a youtube channel where you post new videos a few times a week.

Build it up big, then sell the ebook through it.

Someone just randomly buying an ebook I can't imagine.

Unless it's on a very niche topic with no other resources.

there is no work put into these guides

Hello, I bought ebook [HUSTLER'S BLUEPRINT] >> [EARN \$5400+/MONTH] [NO INVESTMENT] [SUCCESS OR FULL REFUND]

<https://hackforums.net/showthread.php?tid=5756387>

I received improperly written, unfinished like ebook, already public ebook as I have heard, had to repeatedly ask questions about the steps which have been really poorly written.

Seller told me I violated his ToS because ive asked way too much, but I had to ask much questions because of the badly written guide?

He couldnt explain me why he stated in his guide that a Android emulator was needed even that he told me that one app called "textmenow" that was needed, was only worked in iOS.

Also he didnt stated in the guide that it doesnt work for Europeans, the app itself, so for me this guide aint working, also in the thread it states its not about amazon, yet it involves amazon!!!

proof: <https://pastebin.com/46Ry0rRR>

I demand my money back.

Seller offered me solutions:

I dont accept either of these two.

I want full refund and never to hear about this liar again.

WHY COMMUNITY ALERT:

This ebook is just re-written copy of already public methods.

There is no "bonus" content worth 150\$ but more like 0\$ content.

It also ilvoves amazon method which is so saturated that it never work.

I want to warn everyone dont buy this - its pure scam, seller basically blocked me on skype

because Ive asked too much questions about how to do the method - instead, PM me, so I can tell you more about this shit and actually help you not loosing your precious money, just like I did.

lol alright, well as stated before in my opinion it's trying to find a needle in a haystack and you need to pay every try.

James Burnham - December 1, 2017, 9:10 am

Probably rich people don't sell methods here. But even if they did, their guides would either be so lengthy and tiring to read that most buyers would not have the devotion needed to apply them or they would be so generic that people that would try applying them would meet tons of difficulties. In both cases the seller does not risk increasing his competition. Generally, most ebooks have somewhat good content and I would really appreciate them if they were not so overpriced.

Sombera - December 1, 2017, 9:31 am
