Thread: [Unable to update signature](#)

Who Soup - December 1, 2017, 1:29 pm

I'm unable to update the text above my signature,

when I try to it says "signature image doesn't exist.", I re uploaded it on imgur for a fresh link but still have the same message. Does anyone else have this problem or know how to fix it?

The link of the image? (it's a .gif if that makes any difference)

yeah, I'm not trying to change the image just the text above it.

"Conquer any obstacle" to "God mode: Activated."

Try sending me the whole text inside your signature box.

Nothing looks out of the ordinary to me; the image just links to the business savvy section.

Oh, you're right, maybe the signature uploading thing is broken, it happens from time to time. Let Omniscient reply, It worked when I hit preview signature but other than that, rip.

You have to add the dimensions of the signature to get that error removed. It happens sometimes.
