Simple java program using JSoup, that will scrap proxies and will give you the residential IP's.

Anyway, It scrapes 1 elite proxy every 2-3 minutes. More than enough for me. Doing it manually took around 5-6 mins !

Running it on VPS and selling it on forums/websites. Completely working proxies.

The last 10 I checked were scrapped 1 month ago and 8 were still working great !

I pmed you buddy

I bought this but I'm disapointed at the time because I tought this will scraped elite proxy like for cracking but it turns to weird residential ip like my real ip adress and those proxy does not turn into an IP:PORT format proxy so yeah I don't know how to used those residential ip how to checked them etc

but I have one thing to say its why did you put elite proxy if those are just residential ip ?
