Thread: [Make \\$25+ every 24h per Mining rig - www.Optiminer.eu](#)

The Illusionist - December 4, 2017, 2:07 am

12-7-2017 - 300 Mining Rigs are currently active on [www.Optiminer.eu](#) !

M?xim - December 4, 2017, 2:09 am

Looks cool. Not a miner myself but seems like a steady project. Am liking the site.

Rubentastic - December 4, 2017, 2:23 am

I can vouch for this. Currently mining MNX with Optiminer and making aprox. 1 MNX/day ?!

HITBONES - December 4, 2017, 2:46 am

what is the mining algorithm for this ? script ?

dont mind my noob question

Thank you

Thank you

These are "equihash" based coins. And we're looking to expand to different algorithms.

Mr Kewl - December 4, 2017, 3:08 am

Wow that's crazy man. Good luck with this.

Mr Brown - December 4, 2017, 3:10 am

looks pretty decent, im not into mining but this seems like something professional gl

TheIndex - December 4, 2017, 4:12 am

Have tried this out myself and get 1MNX per rig, I got 4 rigs.

dniamn101 - December 4, 2017, 4:38 am

Looks good. Want to invest money? Can I send you a message?

Uncle Drew - December 4, 2017, 4:52 am

Posting so I can get back to this tomorrow.

shreder - December 4, 2017, 5:13 am

He wrote this 2hrs ago it was \$54 its \$32 dollars now fell 40% ill check this out though

The Illusionist - December 4, 2017, 7:21 am

MXN back on \$50, there was a small crash but a quick recovery as well. I expect the coin to bounce between \$40-60 for a while.

Payouts of Optiminer are multiple times per day so you can sell your MXN whenever you want!

Vouch for my brother,
100% uptime and reliable pool :)

Money Man - December 4, 2017, 8:36 am

Huge vouch for my man right here
About to set my 40 rigs on this script :)

Tee Plow - December 4, 2017, 12:06 pm

50ksols.

Uncle Drew - December 4, 2017, 4:33 pm

On the process on transferring my rig to this. Got ethos booted up, remote.conf is edited, but I'm too retarded to understand how to config local.conf. Mind helping me out?

Got 4 GTX 1060 and 4 P106s.

westwol - December 4, 2017, 5:43 pm

Is there any way to use it under Windows?

shreder - December 4, 2017, 6:10 pm

I'm curious how exactly are you getting 50x what other miners are getting?

Also are you going to make this script for windows?

No this will not be available on windows.

And it's not 50x more profit, one rig doesn't mine \$1 per day, mining Ether you make around \$9 per day so its roughly 5-6 times more profit.

It's all about boosting your GPU performance, a faster algorithm to crack blocks and an efficient coin to mine.

TheIndex - December 5, 2017, 6:09 am

I can vouch for Illusionist, i'm using the software myself.

It's just regular mining mate. It's not some weird system where we use your rig to do random things, optiminer.eu is a mining pool. The only difference is we supply an advanced mining operating system to mine more coins.

These are all incoming payments from the largest miner on www.optiminer.eu

interested in this.

I'll see what my 10 RX580's can produce daily

shreder - December 5, 2017, 8:59 am

Hmm ill see but i was getting 2k sols on windows with 6x1060 what your getting is 25x atleast.

Vouch! Currently using right now and seems promising. The Illusionist even helped me out to set it all up.

Money Man - December 5, 2017, 11:08 am

Can confirm you get over 1 MNX a day with 6 1060's
Will post pics later. Moving ten rigs over :)

The Illusionist - December 5, 2017, 12:39 pm

Over 125 MNX (\$5500+) has been paid out to miners who use www.optiminer.eu

Linux only, this is currently designed to run on a dedicated mining machine. These machines should always run on Linux as it far more efficient.

Yes.

oParoxysm - December 5, 2017, 1:57 pm

I have my doubts, as I have a 1060 that mines \$2.50 a day (at max). (\$2.50 per card)x(6GPU's)=\$15.00). There's no way you're more than tripping your mining speed with the same card.

Insta - December 5, 2017, 1:59 pm

So what makes the miner so powerful? i tried mining minexcoin with my gtx1060 X6, its only 3k sols.

If the mining software is real, this is a real game changer, a lot miner will use this i suppose?

hopefullaker - December 5, 2017, 2:05 pm

im interested in this, but sadly im a noob. any tips or tricks you guys know of? or websites/videos i can watch for first timers? any help is much appreciated ?

Like I've explained above, Optiminer uses a special algorithm where it can get more sols per GPU. There are currently 50 rigs connected to the software and multiple users on this forum use the software. They left their feedback on this thread.

Yes it's quite the gamer changer :), you should try it out and post your feedback. Optiminer gives roughly 7000-7500 sols per 1060.

thats pretty normal.

funstimebest - December 6, 2017, 5:46 pm

I am considering to try it out with my 3 workers, but...

why did MinerX drop so much recently?

<https://coinmarketcap.com/currencies/minexcoin/>

if it stops dropping and spikes again, now would be the time to mine it.

I just want to know if in fact if it's being undervalued or is really worth what it's currently valued.

Simple question but complicated to answer truthfully.

Even with the current price of \$30, mining \$30-\$35 per day per rig is still a lot more then any other coins would make you.

I think MNX will climb back to \$40-50 in the next few weeks.

shreder - December 7, 2017, 8:06 am

Heard some good things of this miner however been watching this address over a few days

<http://www.optiminer.eu/workers/XNDwqTV1iseN9FV7WgzRjcjcafaHSwAChP>

He gets on average over 50k sols which is how much a 6x1060 rig would get which you claim gets 1mnx a day but he has less than 1 after a few days? Ive been watching closely

Only making 0.50 MNX per 24H with a 5x GTX 1060 6GB rig. I think I mess up something with the configuration.

The Illusionist - December 7, 2017, 12:09 pm

Optiminer has reached 300 rigs connected to the network and software!

Same issue I've been facing currently getting only 0.4-0.5 MNX coin per day with one rig of 6 GPU = 1060.

Pm me bro when here.

The Illusionist - December 8, 2017, 5:27 pm

The difficulty of MNX climbed recently giving less MNX per 24h, however the difficulty just dropped by 10% so we're back into full mining mode :)

Not sure cuz I can't find an estimate lol I wanna know if it works with 3gb cards 1060

ALT+F4 - January 20, 2018, 8:20 pm

Has anyone tried this? I'm seeing thread updated recently. Price of MNX though is down almost 60% to 25\$ per coin so I would assume 3x1060's should still be 20\$ per day but this depends on

mining difficulty which MXN is currently at 3/6 of 19 million coins. Very interested I might try this later tonight on my single 1070 and if produces at least close to these kinds of results switch over my rig which runs on ETHOS.

You are totally right... I somehow way misread the OP. It's 6x1060 not 3x1060 which is what I was basing my math off. That's still not bad if you're getting 8.33 per card/24hours. I have a 1070 and get 3-4 per card/24 on Zclassic.
