The Christmas Gift Game sounds new, how is the probability calculated?

edit//

Here's my vouch review:

First of all, I do NOT recommend Nisam's botshop service and here are the reasons why. OP acted aggressively and is unwilling to help when I asked for guidance and support

OP EXPECTS YOU TO CREATE YOUR OWN WEBHOSTING AND UPLOAD YOUR OWN STUB

Recommends you to upload the stub on ZippyShare when they clearly distribute - showing lack of knowledge(?)

you have NO way to track your order

Also I have received 0 bots online.

I don't think I'm the only user who experienced problems so, who knows the quality of his service might change

Me and my goons have been working very hard during some of the night and day on getting everything solved.

Our end is fixed and orders are being delivered as casual.

I am again accepting sales, so please do not be hesitant to contact :)

I contacted those of you who where affected by it and I'm rewarding every of the affected with extra loads.

Best Regards,

Nisam.

Still waiting for my traffic...
