Thread: [Successfully Blocked Access To A Potentially Malicious Website](#)

Bluffer - December 4, 2017, 10:31 pm

So I keep getting this every 5 or so minutes. Am I infected?

<https://prnt.sc/hj8o4r>

AsSaSs@iN - December 5, 2017, 3:48 am

The IP appears to belong to SoftLayer Technologies.

This ^

So if you are infected they are operating off a dedicated server

Would it be safe to assume that this was Malware Bytes protecting from web traffic, or could it be from an already installed application trying to connect to his/an outside network?

Could be either... I'm not sure what he was doing at the time it happened/what software is running.

People have reported it before.

<https://www.abuseipdb.com/check/173.244.200.123>

<https://www.tcpiputils.com/browse/ip-address/173.244.200.123>

The IP you provided is being hosted by <https://www.midphase.com> which is then linked with:

<https://www.westhost.com>

<https://www.uk2group.com>
