(Feb 3, 2018 06:19 PM)Game Freak Wrote: [\[CITE\]](#) Vouch for MikeDinero and his Gmail Creator bot. I must say I was a little unsure about this at first, then I got it and it was amazing.

First, it comes with instructional videos with his seducing voice, and he shows you step by step how to run it.

The UI is extremely clean, and gives you two options of using SMS, for being more cost effective. You can run it and watch it go thru all of the steps.

Amazing proxy integration.

After it creates it, it exports it to a .txt file, which is nice, easy access.

Thank you again.

This is great for stating your own Gmail shop, or having a way to make unlimited Gmails for your own methods and uses.

Big money saver, and money getter.

Thanks!!!

(Feb 3, 2018 08:53 PM)Horus God Wrote: [\[CITE\]](#) Vouch for MikeDinero, this is most helpful tool i have seen

its took about one min to creation one account

tool is fully automation and two option of api sms sites.

and you can also use proxies.

every option on tool its works perfect.

and its easy to setup

just setup api key and press go then take couple of tee

then come to watch tons of accounts got created.

if you going to build your own shop of gmail accounts

just do small math

$1 \times 60 = 60$ gmail accounts per hour.

$24 \times 60 = 1440$ gmail accounts per 24 hours wow very nice.

if you selling 10 accounts per day will got awesome profit.

Very helpful Tool i have seen, GLWS MikeDin£ro.

Fortune - December 6, 2017, 11:10 am

Do you offer any vouch copies? Anyways good luck with this it's looking awesome!

\$\$UFIS - December 6, 2017, 11:23 am

(Dec 6, 2017 11:54 AM)MikeDin£ro Wrote: [\[CITE\]](#) Create unlimited pva Gmail accounts on autopilot that you can use or sell with this awesome software!!!

How would you like to create an unlimited amount of phone verified gmail accounts all with the click of a few buttons that you can use for various marketing projects or sell for a hefty profit?!?

Well i have a solution to help you do just that!

But first let me ask you a few questions...

: Are you sick buying crap accounts that end up getting block from unreliable sellers?

: or how about the time it takes to get the accounts when you really need them, sometimes it can take days after purchasing before you even get your accounts?

: Or maybe your like me and dont want to be at the mercy of greedy pva account sellers and would like to have a way to create gmail accounts on mass automatically?

Well trust me i can understand and i have a solution to all the above!

You see, For a long time i was buying pva gmail accounts from different sellers for some of my projects, But one thing that used to annoy me was when suddenly just when you find what seemed like a reliable pva seller they then go offline or stop selling...

Then when you do find a service that can provide accounts regularly there would still be issues, Because the time it would take to get my accounts once i purchased them was ridiculous!

So i decided to take things into my own hands and break free from needing to buy my gmail accounts and just create my own...

But there was still one problem?!?

Even though i had a service to verify my own gmail accounts via sms for pennies it still took time to manually create all these accounts...

So i had to fire up the thinking cap and find a way to automate the entire process!...

And thats exactly what i did!!!

After months of planning and development i managed to create a badass fully functional PVA gmail account creator software that can create gmail accounts on the fly all on autopilot!

And Now im opening up the doors to you!...

So what makes this special?...

- : no more wasting money paying for pva gmail accounts that go dead it a few days.
- : no more waiting days before you recieve your gmail accounts after purchase.
- : no more having to hunt for reliable sellers that can provide accounts when you need them.
- : no more paying through the ears for gmail accounts as it can get expensive when you need alot.
- : no paying for alternative expensive software that use a credit system for each account you create on top of a \$90+ upfront cost with monthly fee's.

You dont have to worry about the above anymore!

Introducing my gmail account creator your solution for creating unlimited high quality gmail pva accounts that you can use or sell to make serious bank!

Here's a few things that this software will help with...

- : Create an unlimited amount of phone verified gmail accounts whenever you want!
- : Each account will only cost you pennies to create which is a huge difference from paying expensive prices from third party sellers.
- : create your own fully verified gmail accounts that you can trust to work as needed whenever needed.
- : These accounts have multiple uses, from using them for your marketing projects to make money, selling them for serious bank, etc.
- : fire up the software whenever you need quality pva gmail accounts and let it work its magic on fully auto.

Plus so much more!

Now lets take a look at some of the features of this amazing software!...

- : custom delay feature - to set your own delays inbetween account creation.
- : inbuilt smart delays - the software has random delays throughout actions to seem human like to google.
- : inbuilt sms feature - software intergrates directly with a high quality sms verification service to verify and create accounts on autopilot.
- : lightning fast - software creates gmail accounts super fast on the fly your only limited by your internet speed and quality of your proxies.

: Highly customizable - you can pick the gender, location, recovery emails, etc.

: compatible with proxies - its always a good idea to use proxies when creating alot of accounts to avoid getting your ip banned and this software takes care of that.

And that just the tip of the iceberg as many more cool features will be added in the future!

So i know your probably wondering how much this killer software is going to cost?...

Well thats a fair question considering the alternative solutions and costs and the features of this awesome software i could easily sell this for \$97 upfront with a monthly fee like many others would do...

But im not others and you know i love to give back to my HF family!

So for a "Limited time" you can grab my PVA gmail account creator from a measly \$39.99!!!

LIFETIME IICENSE - \$39.99 One-Time

But hurry because im only selling "100 licenses" then the doors are closed until further notice to avoid the software being abused!

So grab your own PVA gmail account creator today while you still can by hitting the button below!

LIFETIME IICENSE - \$39.99 One-Time

The software does exactly as stated on the tin so any refunds requests will only be given at my own discretion, especially for random reasons like..."can i have a refund because this is not for me...", i spent alot of time developing this personally for my own personal use and decided to share it with you guys so please respect that ?

Online and taking orders...Other Account creators coming real soon folks stay tuned for updates!

themad2403 - February 8, 2018, 9:22 pm

After the accounts have been made, if i login from another ip or country different from the proxies that made the accounts it will ask for verification or something like that?

MikeDin£ro - February 10, 2018, 8:08 pm

@themad2403 It will usually ask you for a "recovery email" which is why the software has this covered and enters recovery email when creating accounts and saves the details to a txt file for easy access ?

what things are saved in txt file? does it save the number that was used to verify the account?

MikeDin£ro - February 26, 2018, 1:46 pm

(Feb 24, 2018 01:36 AM)lance4182 Wrote: [\[CITE\]](#) what things are saved in txt file? does it save the number that was used to verify the account?

No it dont save the number used it saves the recovery email instead so if google asks you to confirm your the owner of the account at anytime you can simply enter your recovery email for the account and bypass security...simples!?

Its saves the data in the following format(email, pass, recovery email, gender, ip)

War On Retail - March 3, 2018, 5:34 pm

I bought this and The program will make accounts. The problems I had with it is I used the first phone verification the program refers me to. Well it doesnt work right or atleast it didnt for me. I contacted OP and he told me to use the other one so I just said screw it and ate the \$5 I uploaded on that account. So then he gives me instructions for the other one and tells me to get Elite proxies. So I do everything he says and I go to a trusted place for proxies and I buy some. I upload \$10 on the otehr phone verification site and I have no issues linking it to the program. so I run the program and made sure the use proxy box was checked. It made one account 5-10 minutes later. I did not check the account because I had some work to go do. So I leave the house and left the program running. I come back 8-9 hours later and an error message keeps popping up something about 105 value. I checked the accounts list and it made a total of 7 accounts while I was gone. it used a total of \$2.80 in the phone verification. I contacted OP telling him about it and how the program was working but not fast at all and how a error message kept popping but. Right after I send the message I go to check the accounts to make sure they work. I go to log in and it says the accounts were disabled. so it does make you accounts but apparently , for me, all the accounts got banned. so I am not saying its not worth the buy, but seeing how as soon as I contact seller telling him I am having so many issues and all he did was tell me how either I or the thirs party or the proxies were the cause I could not tell you if this works properly. So either the program is set up to be used with specific proxies of which the program does nto tell you where to get them. or the phone verification which the program refers you to both suck and do not work properly or somethign I was doing wrong which the OP was not trying to help me figure out so I will not use this but as for my review I will just let you make up your own mind if this is worth \$40. I paid \$0.40 for 7 banned gmails to me not worht it. to me it was \$65 wasted

MikeDin£ro - March 3, 2018, 6:30 pm

Actually you were acting kinda sketchy from early...you skype me telling me you couldnt get the software working at the same time as asking me to create some random software that generates giftcards, then you skip back to asking about the gmail bot and how its working for you now and tell me you'll get back to me with the giftcard method you want automated ?

Anywayz then today(the next day from our previous chat) you tried to ask me for a refund because your having issues with the software again before i could even offer to resolve the issue you were supposedly having, which i tried to tell you if you were having problems with google banning the accounts its most likely a proxy issue, even something like logging into the accounts without clearing cookies and changing proxy can get them flagged as google is crazy strict which is what i reckon you did.

I also tried to advise you on the best sms service to use for the best results(faster, etc) with the software, then you message me saying that the sms service overcharged you for an account at which point i told you to contact they're support and explain the situation as im not affiliated with them i only use they're api in my software i dont control they're rates/pricing...

Then you message me back saying im unprofessional etc etc.

your the only one having any issues with the software. just because you havent taken the time to learn to use it properly doesnt mean it dont work...

I was more than professional with you even though you were all over the place but tbh i think you just wanted a refund from the begining, and you opened a claim with paypal not to long after leaving your review, smh real mature mate ?

How long does the account created from your bot live?

Can you point me out the cost for setup to use your bot? (like proxies, smm code)

MikeDin£ro - May 7, 2018, 9:05 pm

All the accounts you create should work fine and stay live, the only exception is if you use crappy public proxies to create accounts then some of them might get flagged/deleted but you can avoid any issues by using either freshly scrapped public proxies or shared private proxies, and also using long delays inbetween accounts being created...

: Shared private proxies should cost you around 0.50+ per proxy or \$10+ for public proxy scrapper software.

: sms platform will cost around \$5 minimum deposit and \$0.10 - \$0.50 per account created/verified.

Hope that helps mate ?
