Thread: [Openload embed video to Wordpress ?](#)

Gatot Kaca - December 7, 2017, 12:36 pm

How to input embed openload videos too my wordpress ?
what kind plugin easy and fast to use it ?
any advice ?

Never messed with openload but if they have iframe code or something similar then it can be added into your wordpress page via visual editor or your wordpress theme editor. Not that hard.

fieldy2018 - December 11, 2017, 11:54 pm

openload has iframe code, just put it on your post ..

ankitagrawal - January 28, 2018, 11:54 pm

No need to use plugin
you just put iframe code into your post and page
it will work

Just like what the people said above, you dont have to use any plugin. Just simply use the embed code/iframe code.

It's easy you can use iframe that's it..! No plugin is required to do this thing.

Go to file manager.

Click on the file you want to embed.

Click embed up the top.

Click on embed code.

Highlight and copy the code and then past on your wordpress.

LMK if it doesn't work.

What videos are you trying to use? Is it copyrighted content? :(
