Thread: [Unknown RAT - The Best RAT right now & it's Java, anyone have jCrypter? PAYING](#)

GiftCodes - December 10, 2017, 9:54 am

Hey guys are any of you familiar with Unknown RAT?

Since Windows Smartscreen upped it's game and asks for every downloaded exe with out a cert now, I think Unknown RAT is going to become very popular.

To me, it's the best alternative to Luminosity. Much better than any of the RAT's offered here. And you can find it free.

Does anyone have jCryper? I need a FUD crypt and currently have no BTC so cannot access my bots. I have 200 online all the time and cannot access them. I'm willing to send bots or a \$10 Steam gift card to anyone that can crypt for me! Or, I can pay you BTC when I can access my bots. (I make it fast)

Let me know guys! I have returned to ratting (been ratting 10 years now) and am excited to use Unknown RAT. Check it out! Or if you use it already, let me know what you think about it.

SIM-2875347 - December 10, 2017, 10:17 am

Luminosity is down though...

GiftCodes - December 10, 2017, 10:17 am

(Dec 10, 2017 11:17 AM)Buildoman Wrote: [\[CITE\]](#) Luminosity is down though...

Yes, so this is a great alternative. You should check it out, you won't be disappointed.

larth1992 - December 10, 2017, 2:31 pm

I have jcrypter what's your skype or discord?

GiftCodes - December 11, 2017, 4:59 am

(Dec 10, 2017 03:31 PM)larth1992 Wrote: [\[CITE\]](#) I have jcrypter what's your skype or discord?
My Skype is exploit.im (Alex)

I will make it worth your trouble of helping me, big time.

Solution77 - December 13, 2017, 7:23 am

MY jcrypter is won't login..I don't why..have contacted the admin, said the server is down.. Anyone else with same issue?

Roberto Scorpious Malfoy - December 13, 2017, 7:25 am

What is Unknown rat? Can you link it to me?

martigo333 - March 8, 2018, 12:21 am

Reading to check back later...

CyberStrike - March 8, 2018, 4:36 am

Jcrypt <https://github.com/redpoison/jcrypt>

Have you checked out ProGaurd it is an obfuscation tool .. legit works well .

For UnknownRat?

Piotrek6440 - September 24, 2018, 11:22 am

Unknown Rat Doesn't work anymore , does it ?

Dances With Cats - September 24, 2018, 7:53 pm

I'm pretty sure you can only find cracked version now on sites whose posters I would have to assume are backdooring the cracked versions

Proceed with great care.

Piotrek6440 - September 25, 2018, 2:19 pm

Thanks for the reply , I've found a cracked version and also found something fishy about it , If you know anything about Java , we could maybe discuss about it ?

Dances With Cats - September 26, 2018, 2:40 pm

My only advice is DON'T trust anything you download from cracking sites ... I think we all know the ones we mean .. ?

Java rats are a tough call some people love em, most hate them.

I've had mixed success. I loved Redp0ison's Jrat, but it was hellish temperamental ...

Piotrek6440 - September 26, 2018, 3:21 pm

Thanks for the warning , I will keep that in mind , I'm about to purchase OScelestial from another website. Before buying , I wanna ask , is OScelestial still running ? can you actually still buy this product off other websites , if you'd like to see where I'm buying from this is the website. <https://hack-exploits.com>

Mans Hot For Life - September 26, 2018, 3:28 pm

Yeah I feel like these rats should be taking to a cage these days....

Pretty sure that rat has been dead forever.

That website is a scam

Ahh and here I was wondering why jcrypt was mentioned and seeing a screen grab of proguard. Now looking at the error it didn't find that file (rt.jar) You got the right version of java installed? What version? Is Java part of your environment path?

<https://sourceforge.net/p/proguard/discussion/search/?q=rt.jar+not+found&project=0>

I installed java 8

I don't think is part of my environment. How can i correct it?

Thanks for your quick reply

Hello,

please can i have your skype contact or jabber? need help regarding java crypter

notDiscoli - October 26, 2018, 6:02 am

I'll have a guide out soon for completely FUD and un-crackable encryption, in the meanwhile I found this: <https://hackforums.net/showthread.php?tid=5433633>

I'll verify the accuracy of that in 2018 but looks like it should work :)

Peter1_1 - November 20, 2018, 3:09 pm

Sorry for bringing this topic from the grave , but Unknown rat is based on a client platform , basicaly to open the whole RAT platform to create the stub etc , it needs to connect to a website that has some sort of files. Iv being trying to reverse engineer this program for so long. I have very little knowledge about Java language , and id love to get this rat once again in my hands. Would anyone know a website or a method of retrieving this rat back? Any suggestions or help would be extremely helpful and id also be thankful
