Thread: [Obtain powerful 32+ CPU bare metal servers \[\\$600/yr XMR per server \]](#)

REDVOID™ - December 10, 2017, 12:46 pm

I've seen others sell this here, and i believe for my taste, it's very expensive.

So, i'm offering this at \$150 \$65 per copy!

Giving away only 1 vouch copy to highly reputed member. Claimed (0/1)

This is a no BS method to obtain long-lasting servers (12 months) that are very very powerful.

You can use these servers for mining XMR, web hosting, game server hosting, you name it!
Doing this method more than once is possible with good opsec skills.

No support will be given for using the servers. If you don't know how to use Linux or how to start a web hosting company through a bare metal server, then you will have to Google for yourself.

Each time you attempt the method, you will have to make a very low investment, under \$10.

PROOF:

Limited Copies will be sold

FAQ

Does this work worldwide?

Yes, it works anywhere with an internet connection.

How much XMR do you get with one server?

It mines at around 1.2kh/s so I expect around 7 XMR in one year as long as the network hash rate stays the same. And that's just for ONE server. So a conservative estimate imo, \$600 worth for one server in a year.

For the cost of the method and low investment, you're looking at a 545% investment if you only did this with one server.

How easy is it to get a server?

Not that hard. Expect to have to put in a few hours of work. But for these expensive servers, it's very worth it.

Will these last 12 full months?

As long as you do everything right and have good opsec (if scaling the method), then yes, each

server lasts 12 months.

Are there any other costs than the initial <\$10 investment?

No other costs other than your time and patience.

Does this have anything to do with AWS, Google Cloud, Azure, etc?

No. This has nothing to do with them or anything related to duping free trials or whatever else you can think of.

Why sell this?

I'm done using the method as I'm busy working on other things. It gets tiring doing this after you've done it so much. There's also no risk of it being saturated and after you buy the method you will see why.

Is this the method that involves signing up for Global Entrepreneur?

I can't PM as only 1 post, so if it is I will remove.
