Before you guys post, I did check his rep.

Description: Wanted BTC for PP. I went first. Sent \$383 I think to him. He would send \$409 to me.

After I sent it to him this was his response.

I couldn't even said him a PM cause he disabled it after he sent that PM to me.

RIP my man... Should have used a middle man, did you check to see if he had any deal disputes before trading?

What do you mean by this?

Quote:Sent \$383 I think to him.

Also, if you checked his UID - why did you not consider the ~8+ scam reports on him before dealing?
