Earth is flat because otherwise the people on the bottom half of earth would fall. The pictures of 3d earth are optical illusions.

Space• - December 12, 2017, 2:09 am

The Earth is actually triangular, Mount Everest is one of its peaks.

ZerFallen - December 12, 2017, 2:21 am

Omni is a little trigger happy when it comes to discussions regarding the flat-earth movement. Just letting you know.

lfinger - December 12, 2017, 3:14 am

There are no real photos of Earth.

If the earth was round then when you shoot a bullet it should go around the earth and hit you in the back of the head but it doesn't. Earth is flat. End of.

Hoodie+ - December 12, 2017, 3:40 am

ryanryan821 - December 12, 2017, 7:43 am

The earth is triangle. Not round and flat.

Kareem - December 12, 2017, 9:28 am

If you've ever climbed a mountain and looked down at the earth from the peak then u know the earth is round. Simple. It has to be a tall mountain tho
