Thread: [Scammed by Nisam | 100\\$ | UID: 3739627](#)

blackout_001 - December 12, 2017, 11:29 am

UPDATE: Im talking on XMPP with him, he explained problems he had and he's managing to fill my order now. I'll ask for a closure of this thread when i'll receive everything.

I got scammed by this User named Nisam (UID 3739627) -> [Profile LINK](#)

Thread -> <https://hackforums.net/showthread.php?tid=5762649>

STORY:

(proofs next explanation)

After seeing his thread here on HF, i contacted him to buy some load.

I dealed to buy 1000 load for 100\$.

I payed via BTC (100\$ so 0.00767btc when BTC was at 13037\$ -> now valued 133\$).

Transaction required a day, so we had to wait till confirmation. After transaction was completed i managed to send him my stub.

Initially he said that my transaction was not confirmed (he was watching wrong transaction, mine had 157confirmation at the moment), then he realized his error and started filling my order.

I saw that hits on stub-link was stuck at 68 so i contacted him to know what was going on. (68 hit on link and about 20 installs)

He told me that was a problem of my stub so i provided him another stub-link to propagate.

Next day i saw that hits on new stub-link was stuck at 127 (i did receive about 60/70 installs, but dont care about the conversion rate).

I noticed him and he told me that i got what i payed for!

He was thinking i payed just 20\$ (he had my transaction link from days before, lol) and to let me happy he was giving me another 200load (to shut my mouth and let me give vouch on his thread).

After explaining (for the second time) i payed for 1000load instead of 200, he finally understood he was wrong and told me he was senting new link (third stub-link i had to give him) to send my 1000load plus some extra to sorry for the delay.

From that day, he never answered to me asking why i was not receiving my load.

I'm waiting his answer since 3 days. -> I payed him 6days ago.

PROOFS

Entire conversation from payment received till today (i haven't previous conversation cause i didnt log anything before. But still everything is written here.):

Link to HTML log of the conversation (download the file and open with your browser to see) ->

Hits on Stub-Link:

Link n.1 -> <https://imgur.com/a/4wfwc>

Link n.2 -> <https://imgur.com/NMzCrjY>

Link n.3 -> <https://imgur.com/Ni3TZZI>

On link n.3 you'll see 40hits. I used that link to test stub on my bot to see if it was working.

He even admitted to be able to receive my messages, he opens a scam report cause he is too stupid to know how to use OTR plugin.

I also got scammed by Nisam. It's pathetic that I didn't even want to open a dispute thread.
He ignored my messages after the payment got verified, and delivered 50% less loads in the end.

Also called me an idiot. I guess he thinks all of his clients are idiots for even trying to buy from him?

Anyway mate, I hope you get your loads, or a refund...
