it seems that after btc destroyed pretty much all altcoins since june, altcoins are finally starting to catch over and increasing their satoshi value while btc struggles to stay above 17k.

What is your view on this situation ? From your point of view in what percentage should btc be present in our portfolio ?

thanks

He told to buy NXT when it was 0.66\$

Now it is stable at 1\$ with more potential.

That's solid 50% profit. Thank you Grizzlies

dies down. I bought all my XVG at .05 and sold at .14, so I did alright there for holding only 2 days. That being said, DBG has been seeing tiny bumps since I bought in, but nothing too crazy. What is the timetable on the bump we are expecting and do we think it hits .10?

Correction and fake news. Always keep your stoploss in your mind and buy more while it dips. People bought BTC before the Altcoin corrections to get some more Altcoins afterwards.

When you don't do stupid things like panicking and selling your coins or ignoring your stoploss because of fake news you don't get the "damn why did I" "If I only .." moments.

"www2.pic-upload.de/img/34545763/IMG_4283.png" < Example for XVG fake news.

The price has dipped in the past days purely because of FUD.

The price is dipping today because McAfee is off the hinges.

Okay thanks for clearing that up. By the way it says "Q4 2018" in your user title and I think it means to say "Q4 17" ?

It was going back to normal, then John decided he wanted more cheap Verge and burned it on Twitter.

It's not long been released and how a small market cap, invest now and you could see a return of around 100%+ if it takes off, if it's promising.

It could just be another shit coin waiting to get pumped and dumped too, who knows.

I've got a few thousand BNTY just sitting there for now, if it takes off great, if not no massive loss.

Not speaking for Grizzlies though, just throwing my opinion out there. He's made some great calls :)

Today was an INSANE day on Grizzlies Trading calls!

A total of \$266 in profit today alone!

Some of the low amount trades were done by me and I had lower leverage than Grizzlies. A total of 129% profit today if I were to have used the same leverage.

Great fucking calls! A true legend! ???

I would be careful with staking on VeraWallet!

I got banned for those questions. Storing coins long-term with 72h lock on a custodial wallet where they magically say "we will cover all funds in case we get hacked".

Keep it elsewhere is my tips, it's not worth the risk.

Stanley - May 5, 2021, 11:15 am

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley

Just want to bump this -

Grizzlie is a very good with his calls. I did make some money, especially with his Bitcoin calls. There's not a lot of folks like him that offer free signals. Especially now since a lot of them are scams and will just dump your every cent.

If anyone wants to make money instead of gambling it all away, definitely take a look at this channel. Putting anywhere from \$20 to \$100 is fun enough just to make some nice profits :)
