Let me preface this by saying yes, I know he has open scam reports but I was tired & desperate for some UK AGC lmao.

User offered to sell me a £50 AGC.co.uk code for 65%, sent him the Ethereum & he hasn't responded since.

His address: <https://etherscan.io/address/0xBD6746F3CFF1A0A531b10Cc7b7e7Bf449239C541> (I sent from my Bittrex account)

Transaction:

It's only \$45 but that's such a petty amount. Don't really have anything else to say except for the fact that he's moved the funds in to another wallet.

Deal with caution.

None that sell .co.uk sadly. Those that say they do were out of stock for the time I've been waiting.
