What you get with this sale: Shopify store, Domain, FB page, and 7 day support

My profit margins on my main sellers are 70%+. Out of that \$1,400 I've pulled in close to \$800 out of this and I've done very little. All I've done is advertise on a Facebook page with ~30k likes that is niche related, I'm getting about 600 likes, 40 shares and over 200 link clicks per post easily and I don't even post regularly.

If you know how to use something like printify or any other custom t-shirt maker and are even semi-good at making them you will make incredible bank in my niche. I suck at it and haven't added it to my store, but known my fans they will legitimately eat it up[None of my products are custom T-shirts right now].

I will be mentoring and helping you for the first 7 days after purchase, after that you are on your own but if I have free time I would be more than happy to assist with whatever.

To get started I would recommend about a \$50 advertising budget and in my estimations that would bring you to around ~2k in sales if done efficiently. I also recommend you work on adding a few more products (I will give you some good ideas for them). Your only other costs will be \$30 a month to shopify.

Please, please, please PM with at least some proof of funds (at least a few 100) and I will be more than happy to share the FB page and the store link. While I'd prefer BTC/ETH/LTC I will accept paypal from trusted members only (the cost will be slightly higher than if you buy with crypto as well).

If you want to buy it right now its \$350 BTC/ETH/LTC, \$450 Paypal. If you want longer term support and help I can do that for a higher price! I'm open to all offers and maybe even trades!

Still for sale peeps!!! Get it while it's hot

Whats your reason for selling this if I may ask?

Ben Shapiro - December 15, 2017, 12:35 pm

Guys this store is still for sale? What are you waiting for? This is easy money.

That's how shopify graphs it. Its sales in relation to sales over 2 weeks, the graph is a per day graph not the month as a whole.

If you match up each point to the day thats how much was sold, how would a graph of sales over an entire month go down lol.

You can ask Ninja Leaks, and i will obviously be able to verify to anyone who is actually interested.

STILL FOR SALE HMU NOW LETS MAKE A DEAL IM HERE TO HELP!
