<https://i.imgur.com/K3HXr6z.png> ive used it for over 6k in orders, yes you can redeem them safely and no it does not raise any flags. some vendors wont ship unless your paypal name and shipping name and address match though. this has nothing to do with my gift cards though, i just noticed this when trying to purchase something from newegg with them.

Can you store eBay credits onto your account or do you enter them at checkout? And if the balance is able to be stored can you offer \$500 ebay for \$300 BTH?
