I'm sorry but I saw your post on the other thread asking for some help about building some skid virus. I don't think someone will take your group, seriously.

PS: your slogan makes me cringe.

Chill fam, I'm just stating the obvious. Your thread was not pleasing to read unlike any other thread here.

I'm sorry but I don't fit into any of your 3 shitty categories and any hacking group based on Skype will never be successful.
