Thread: [Can't upload my signature? bc its a gif maybe?](#)

iNuke - December 15, 2017, 6:34 am

Hello guys,

I'm having a problem when trying to upload my signature.

Basically I made a gif real quick, that I uploaded here: <https://imgur.com/a/vTRyt>

And I can't seem to put it in my signature. Is that normal?

When I use the IMG tag, it just put this in my sig: [Image: vTRyt]

Nosi - December 15, 2017, 6:36 am

Probably file size is the problem here. Try to convert it into a file with lesser quality => smaller size.

Could you help me do that please? Can't make it work.

Yeah gimme a second

Does this work for you? Lmk through pm if this still doesn't do the job.

Code [align=center][img]https://i.imgur.com/FmvUahX.gif[/img][[/align]

Tried and it says "Signature file size too large. Maximum image size allowed is 500 KB."
