Thread: [\[0.5\\$\]Tremorgames bot](#)

Aegan - December 16, 2017, 12:22 pm

Hello, I am a beginner as of now and here is my first product, how it works : exploits the achievements in the games on Tremorgames which grants you coins and you are able to withdraw steam items and such.

If you do not know what Tremorgames is, look it up!

Be careful with this script and if you have an account with alot of coins on it, be very careful just incase it gets banned, I will not be responsible!

Why do I want money for this simple script? , Simply because I have very minimal resources when it comes to money, and I want to start from somewhere, and I hope I have contributed to the community in some way.

Terms :

I would prefer you not to spread it without my permission.

You are allowed to change and manipulate the code at your complete free will! (written using python)

Not my fault if you get banned!

Price? Well well, I do not want any big money for this but I hope I can get enough to get myself somewhere on the internet.

0.5\$ In bitcoin, not sure about transaction fees and such? ?

But hit me up if interested, if anyone is willing to purchase this I will be very happy! ?

BTC : 12DBKU4En8H5WjgG8PLhHPjSdb4MeyScDX

50 cents in bitcoin would cost like \$3 just to send to you
